THE

DECENNIAL CENSUS OF THE COMMONWEALTH,

1895.

VOLUME III.

INTRODUCTION.

The present volume, the third in the series presenting the results of the Decennial Census of 1895, contains the following sections:

Part 1.
- Parent Nativity: By Native and Foreign Born.
- Parent Nativity: By States and Countries.
- Parent Nativity of Persons 90 years of age and over.

Part 2.
- Schools and School Property.
- Libraries and Reading Rooms.

Part 3.
- Defective Social and Physical Condition. On the basis of Persons.
- Defective Social and Physical Condition. On the basis of Conditions.

Each of these sections, in pamphlet form, has been given to the public as soon as completed. The tabular presentations are accompanied with full analyses, qualifying and explaining the statistics, and these analyses should in every case be carefully considered in interpreting the figures.

HORACE G. WADLIN,
Chief.

BUREAU OF STATISTICS OF LABOR,
STATE HOUSE, BOSTON,
September, 1899.

Parent Nativity:

By Native and Foreign Born.

Parent Nativity.

Parent nativity is shown in the following presentation, in a brief form, for the population, subdivided as to native and foreign born males and females for each county, city, and town and for the State; and as regards the native born still further subdivided to show the number of each sex born in the town named in Massachusetts, in other towns in Massachusetts (including the not specified), in other New England States, and in other United States.

The abbreviation of the words, "native," "foreign," and "unknown," as regards the nativity of the parent, is denoted by the use of italics, as follows: — *n*, for native; *f*, for foreign; *unk*, for unknown. These abbreviations when used in conjunction with the words, "both parents," show, for the persons represented, that they are of purely native or purely foreign parentage, or that the place of birth of both parents is unknown. When used in conjunction with the words, "father" or "mother," these abbreviations show, for example, that the father is native and the mother foreign born, as "Father, *n*, mother, *f*," or that the father is foreign born and the place of birth of the mother unknown, as "Father, *f*, mother, *unk*;" other designations may be read in like manner.

The whole number of designations used in the presentation to indicate parent nativity are as follows:

Both parents, native.	Both parents, *n*.
Both parents, foreign.	Both parents, *f*.
Both parents, unknown.	Both parents, *unk*.
Father, native, mother, foreign.	Father, *n*, mother, *f*.
Father, foreign, mother, native.	Father, *f*, mother, *n*.
Father, native, mother, unknown.	Father, *n*, mother, *unk*.
Father, foreign, mother, unknown.	Father, *f*, mother, *unk*.
Father, unknown, mother, native.	Father, *unk*, mother, *n*.
Father, unknown, mother, foreign.	Father, *unk*, mother, *f*.

The proper method of reading the table is as follows: Under the town of Barnstable (page 5) opposite both parents native (Both parents, *n*,) we find the figures 3,320. These figures indicate that on May 1, 1895, there were 3,320 persons living in the town of Barnstable both of whose parents were native born. Of these, 1,044 males were born in town named (Barnstable), 442 in other towns in Massachusetts, 51 in other New England States than Massachusetts, 44 in other United States than New England, and one in a foreign country. There were 1,076 females who were born in town named (Barnstable), 510 in other towns in Massachusetts, 84 in other New England States than Massachusetts, 65 in other United States than New England, and three were born in foreign countries. The other lines should be read in a similar manner.

PARENT NATIVITY: BY NATIVE AND FOREIGN BORN.

[The italic letters, *n. s.*, denote the abbreviation of the words "not specified." For other abbreviations see page 3, ante.]

Parent Nativity:

By States and Countries.

PARENT NATIVITY: BY STATES AND COUNTRIES.

This presentation gives parent nativity in detail by states and countries, showing the place of birth of the father and of the mother for each person in the State. The persons for whom such parent nativity is shown are subdivided as regards native and foreign born males and females, with totals, for each county, city, and town, and for the State.

The designations used in the presentation to denote the respective states and countries are as follows: Mass., for Massachusetts; N. E., for other New England States; O. S., for Other States, including the Territories and United States, not specified; Ire., for Ireland; C. E., for Canada (English); C. F., for Canada (French); G. B., for Great Britain; B. P., for British Possessions, not otherwise specified; Ger., for Germany; Fr., for France; It., for Italy; Aus., for Austria; Belg., for Belgium; Den., for Denmark; Hol., for Holland; Nor., for Norway; Pol., for Poland; Port., for Portugal; Russ., for Russia; Sp., for Spain; Swe., for Sweden; Swit., for Switzerland; Tur., for Turkey; W. I., for West Indies; and Unk., for Unknown.

In addition to the combinations of parent nativity which are given in detail for towns, in accordance with the above classification of states and countries, other combinations representing parent nativity for a few persons only have been consolidated, the place of birth of the parents being given in the table simply as native, foreign, or unknown, without designating the particular states or countries. In such cases, abbreviations are used, as follows:—nat., for native; for., for foreign; and unk., for unknown being presented in combination either as Nat.—Nat.; Nat.—For.; Nat.—Unk.; For.—Nat.; For.—For.; For.—Unk.; Unk.—Nat.; or Unk.—For., as the case may be, the first designation relating always to the father, and the second to the mother.

In the showing for the State, all combinations of parent nativity, however unimportant, are given in detail, and, in addition, the detail of the respective countries comprehended by the designations of "Great Britain" (G. B.) and "British Possessions" (B. P.), used in the showing for counties, cities, and towns.

The use of the presentation may be illustrated, as follows: In the town of Barnstable, on page 81, line 2, we find that, out of a total population of 4,055, the place of birth of both parents for 2,829 persons is given as "Mass." Of this number of persons having such native parentage, 1,387 are native born males; 1,441, native born females, and one, a foreign born male with native parents. In the same way, we find, for instance, on line 7, that for 39 persons, of whom 19 are native males, 18 native females, and two, foreign born males with native parents, the place of birth of the father is given as "Mass.," and that of the mother as "B. P." Again, on line 15, we find that of the 130 persons for whom the place of birth of both parents is given as "Ire.," 36 are native born males; 34, native born females; 26, foreign born males, and 34, foreign born females, respectively. The condensations previously referred to have been made in the case of comparatively unimportant lines in order to save space in presentation, but in all cases the entire population of a city or town is accounted for as regards parent nativity.

Parent Nativity of Persons 90 Years of Age and Over,	161–179

Parent Nativity: By Native and Foreign Born.

The presentations showing the distribution of the population according to parent nativity are contained upon pages 1–179. The first presentation classifies the population as native born and foreign born, and shows under this classification the parentage of the people, discriminated, as to the native born, so as to indicate the number whose parents were born in the town named, in other towns of Massachusetts, in other New England States, or in other United States; and, as to the foreign born, the number whose parents were also of foreign birth. The presentations relating to the subject of parent nativity are of great importance, as they not only show the extent to which foreign influence has affected the population by including the facts relative to the second generation, but they also show the extent to which persons born in other states have mingled with the population of Massachusetts.

Preceding presentations of the Census have shown the population of foreign birth in the State, and also the place of birth,* but the facts contained herein with reference to parent nativity must be taken into consideration in connection with those relating to the birth of the individual, in order to show the full extent of foreign influence.

The recapitulations of the first presentation relating to parent nativity may be found upon pages 75 and 76. So far as relates to the entire population of the State, namely, 2,500,183, there were 1,735,253 persons who were native born, of whom 444,658 males and 448,668 females were born in the town named in the presentation, that is to say, in the town in which they were enumerated in the Census; 226,786 males and 245,876 females were born in other towns in Massachusetts, except a limited number included in these aggregates whose place of birth was not stated; 118,659 males and 129,772 females were born in other New England States; and 58,209 males and 62,625 females in other United States. Included in the total population, there were 764,930 persons of foreign birth, comprising 366,389 males and 398,541 females. These facts have been brought out in the preceding presentations relating to native and foreign born, but are summarized here in order that they may be considered in connection with the facts relating to parent nativity. As regards the total population of the State, 955,726 persons had both parents native. On the other hand, 1,298,463 had both parents foreign; while the facts as to both parents were unknown with respect to only 26,243 persons. The number whose fathers were native but mothers foreign was 93,808; while 6,057 had native fathers, the parentage of the mother being unknown. Those who had fathers foreign

* See pages 791–803, Vol. I., "Native and Foreign Born;" also pages 579–715, Vol. II., "Place of Birth."

and mothers native number 109,398; while 1,702 had foreign fathers, the parentage of the mother being unknown. The number having native mothers, the parentage of the father being unknown, was 7,120; while 1,666 had foreign mothers, the parentage of the father being unknown. The same details may be drawn from the recapitulation with respect to the native born returned in the town in which they were enumerated, those returned in other Massachusetts towns, other New England States, other United States, and in Foreign Countries, and the information may be obtained by sex. The table will well repay careful study, as it shows very clearly the composition of the population. Of course, in the brief space which we can devote to this analysis, it is impossible to summarize the data for the different cities and towns. The statistics are given in detail, in the main presentation, however, and any person interested in the development of any particular city or town may find there a complete statement of the facts.

From the general presentation, we bring forward in summarized form, an analysis table which shows, by sex, the number of persons having native parentage, foreign parentage, mixed parentage, and unknown parentage, with percentages, as follows:

Parent Nativity. For the State.

Parent Nativity.	Native Born		Foreign Born		Total Native Born	Total Foreign Born	Total Population
	Males	Females	Males	Females			
The State.	848,312	886,941	366,389	398,541	1,735,253	764,930	2,500,183
Native parentage, . .	459,696	493,587	834	1,609	953,283	2,443	955,726
Foreign parentage, . .	269,140	277,690	360,359	391,274	546,830	751,633	1,298,463
Mixed parentage, . .	95,600	100,515	2,879	4,212	196,115	7,091	203,206
Unknown parentage (one or both parents unknown), .	23,876	15,149	2,317	1,446	39,025	3,763	42,788

Percentages.

Parent Nativity.	Native Born		Foreign Born		Total Native Born	Total Foreign Born	Total Population
	Males	Females	Males	Females			
The State.	100.00	100.00	100.00	100.00	100.00	100.00	100.00
Native parentage, . .	54.19	55.65	0.23	0.40	54.94	0.32	38.23
Foreign parentage, . .	31.73	31.31	98.35	98.18	31.51	98.26	51.93
Mixed parentage, . .	11.27	11.33	0.79	1.06	11.30	0.93	8.13
Unknown parentage (one or both parents unknown), .	2.81	1.71	0.63	0.36	2.25	0.49	1.71

From this table, we find that 955,726 persons, or 38.23 per cent of the total population of the State, are of wholly native parentage, that is, have both parents native born. Of the whole number of persons having native parentage, 953,283 are themselves native born, while 2,443 are foreign born. The native born persons having wholly native parentage constitute 54.94 per cent of the total native born persons, while 32 one-hundredths of one per cent of the foreign born persons have native born parents. In explanation it should be pointed out that these last include persons who were either born abroad or at sea while their parents, who are native born, were thus temporarily absent from the country. With respect to the persons of foreign parentage, numbering

in the aggregate 1,298,463, or 51.93 per cent of the total population, 546,830 were themselves native born, comprising 31.51 per cent of the total native born persons; while 751,633 were themselves foreign born, comprising 98.26 per cent of the total foreign born population. The number of persons of mixed parentage is 203,206, or 8.13 per cent of the total population. These include 196,115 native born persons, or 11.30 per cent of the total native born population, and 7,091 foreign born persons, comprising 93 one-hundredths of one per cent of the total foreign born population. The total number of persons for whom the facts as to parentage are unknown is only 42,788, or 1.71 per cent of the total population. These include 39,025 native born persons and 3,763 foreign born persons, constituting, respectively, 2.25 per cent of the native born population, and 49 one-hundredths of one per cent of the foreign born population.

The table is exceedingly interesting, as it portrays quite graphically the particular facts as to the mingling of the foreign and native strains in the population. It shows, for example, that nearly 32 persons in every 100 (31.51 per cent) in our population, classed as native born because they are themselves native born, have foreign parents. It shows also that about 11 persons in every 100 (11.30 per cent) of our native born population have mixed parentage, that is, one parent foreign and one native. Other similar conclusions may be drawn from the table, upon which we cannot enlarge, owing to limitations of space. The reader may be interested in tracing similar facts for our cities and towns, especially our industrial municipalities, from the data contained in the general presentation. We introduce an analysis table relating to the city of Boston, and a similar table can be prepared from the data contained in the presentation, or can be furnished by the Census office upon request, for any city or town in the Commonwealth.

Parent Nativity: City of Boston.

Parent Nativity.	Native Born		Foreign Born		Total Native Born	Total Foreign Born	Total Population
	Males	Females	Males	Females			
Boston.	156,241	160,281	83,425	96,973	316,522	180,398	496,920
Native parentage, . .	67,411	70,549	113	357	137,960	470	138,430
Foreign parentage, . .	65,496	66,658	82,264	95,299	132,154	177,563	309,717
Mixed parentage, . .	19,409	20,509	554	910	39,918	1,464	41,382
Unknown parentage (one or both parents unknown), .	3,925	2,565	494	407	6,490	901	7,391

Percentages.

Parent Nativity.	Native Born		Foreign Born		Total Native Born	Total Foreign Born	Total Population
	Males	Females	Males	Females			
Boston.	100.00	100.00	100.00	100.00	100.00	100.00	100.00
Native parentage, . .	43.15	44.02	0.14	0.37	43.59	0.26	27.86
Foreign parentage, . .	41.92	41.59	98.61	98.27	41.75	98.43	62.32
Mixed parentage, . .	12.42	12.79	0.66	0.94	12.61	0.81	8.33
Unknown parentage (one or both parents unknown), .	2.51	1.60	0.59	0.42	2.05	0.50	1.49

We may note the percentages contained in the foregoing table. They show that of the total population of Boston, 27.86 per cent is of wholly native parentage, including

43.59 per cent of the native born persons in the city, and 26 one-hundredths of one per cent of the foreign born. On the other hand, 62.32 per cent of the total population of the city is of wholly foreign parentage, including 41.75 per cent of the native born persons, and 98.43 per cent of the foreign born. The population of mixed parentage, that is, having one parent foreign and one parent native, constitutes 8.33 per cent of the total population of the city, and includes 12.61 per cent of the total native population, and 81 one-hundredths of one per cent of the total foreign population. The facts as to parentage are unknown as to only 1.49 per cent of the total population.

In order to compare the percentages for the State, which we have just brought out in analysis, with similar percentages for the year 1885, the following table is essential:

Parent Nativity.	Percentages, 1885.			Percentages, 1895.		
	Of Total Native Born	Of Total Foreign Born	Of Total Population	Of Total Native Born	Of Total Foreign Born	Of Total Population
The State.	100.00	100.00	100.00	100.00	100.00	100.00
Native parentage, . .	60.29	0.43	44.05	54.94	0.32	38.23
Foreign parentage, . .	28.49	98.06	47.36	31.51	98.26	51.93
Mixed parentage, . .	8.16	0.81	6.17	11.30	0.93	8.13
Unknown parentage (one or both parents unknown), .	3.06	0.70	2.42	2.25	0.49	1.71

The percentage of the total population represented by persons of wholly native parentage in 1885 was 44.05; in 1895 it had become 38.23. The percentage of the population of wholly foreign parentage in 1885 was 47.36; in 1895 it had risen to 51.93. The persons having one parent native and one parent foreign comprised 6.17 per cent of the total population in 1885, and 8.13 per cent of the total population in 1895. The percentage of the population for whom the facts as to parentage were unknown in each year, respectively, does not greatly vary, being 2.42 in 1885 and 1.71 in 1895.

The following table presents a similar comparison for the city of Boston:

Parent Nativity.	Percentages, 1885.			Percentages, 1895.		
	Of Total Native Born	Of Total Foreign Born	Of Total Population	Of Total Native Born	Of Total Foreign Born	Of Total Population
Boston.	100.00	100.00	100.00	100.00	100.00	100.00
Native parentage, . .	47.34	0.38	31.31	43.59	0.26	27.86
Foreign parentage, . .	39.98	98.20	59.86	41.75	98.43	62.32
Mixed parentage, . .	10.43	0.86	7.16	12.61	0.81	8.33
Unknown parentage (one or both parents unknown), .	2.25	0.56	1.67	2.05	0.50	1.49

In Boston the percentage of the population of wholly native parentage has declined from 31.31 in 1885 to 27.86 in 1895, while the percentage of wholly foreign parentage has risen from 59.86 in 1885 to 62.32 in 1895. The percentage representing the population of mixed parentage, that is, having one parent native and one parent foreign, has risen from 7.16 to 8.33. The facts as to parentage were unknown with respect to 1.67 per cent of the population in 1885, and 1.49 per cent of the population in 1895.

To summarize: In 1885 we find that about 44 persons in every 100 (44.05 per cent) in the State were of wholly native parentage; in 1895 only about 38 persons in every

100 (38.23 per cent) were of wholly native parentage. On the other hand, in 1885 about 47 persons in every 100 (47.36 per cent) were of wholly foreign parentage; in 1895 nearly 52 persons in every 100 (51.93 per cent) were of this class. About six persons in every 100 (6.17 per cent) were of mixed parentage in 1885, and about eight in every 100 (8.13 per cent) in 1895. The foreign strain, of course, has its effect upon the population of mixed parentage. Combining the population of mixed parentage and the population of wholly foreign parentage, we find that about 54 persons in every 100 (53.53 per cent) had either one or both parents foreign in 1885, and about 60 in every 100 (60.06 per cent) in 1895. Conversely, combining those of mixed parentage with those of wholly native parentage, we find that about 50 persons in every 100 (50.22 per cent) had either one or both parents native in 1885, and about 46 in every 100 (46.36 per cent) in 1895.

In the city of Boston, about 31 persons in every 100 (31.31 per cent) were of wholly native parentage in 1885, but only about 28 in every 100 (27.86 per cent) in 1895. The persons of foreign parentage numbered about 60 in every 100 (59.86 per cent) in 1885, and in 1895 numbered about 62 in every 100 (62.32 per cent). About seven persons in every 100 (7.16 per cent) were of mixed parentage in 1885, and about eight in every 100 (8.33 per cent) in 1895. Substantially the same proportion in the State at large were of this class in 1895. Combining the persons of mixed parentage and those of foreign parentage, we find that in Boston about 67 persons in every 100 (67.02 per cent) had either one or both parents foreign in 1885, and about 71 in every 100 (70.65 per cent) in 1895. On the other hand, combining those of mixed parentage and those of wholly native parentage, we find that about 38 persons in every 100 (38.47 per cent) in the city had either one or both parents native in 1885, and about 36 in every 100 (36.19 per cent) in 1895.

Parent Nativity: By States and Countries.

The second presentation relating to parent nativity shows the place of birth of the parents, by states and countries, combined with the place of birth of the person for whom the facts as to parent nativity are given, classified under the head of native and foreign born. This presentation gives the parent nativity of the population in detail, by states and countries, showing the place of birth of the father and of the mother for each person in the State. The persons for whom such parent nativity is shown are, as just stated, subdivided as regards native and foreign born males and females, with total population, for each county, city, and town, and for the State. The note preceding the presentation should be carefully read, in order that the table may be clearly understood. The subject is somewhat complicated, but the form of the table has been fully explained in the note.

The recapitulation for the State appears on pages 152 to 160. While the preceding presentation brought out the general facts as to parent nativity, this enables the reader to trace the influence of the various foreign nationalities. Only the most prominent points can be summarized in this analysis. Of the 2,500,183 persons in the State, 471,594 had both father and mother born in Massachusetts; 72,423 had Massachusetts fathers and mothers of New England birth; 23,598 had fathers born in Massachusetts and mothers born in Other States; 22,496 had fathers born in Massachusetts and mothers born in Ireland; 7,558 had fathers born in Massachusetts and mothers of English Canadian birth; 3,165 had fathers born in Massachusetts and French Canadian mothers; 10,722 had fathers born in Massachusetts and mothers born in Great Britain. These last are subdivided in the recapitulation so as to show the birthplace of the mother, whether in England, Scotland, or Wales. There were 10,763 persons who had fathers born in Massachusetts and whose mothers were natives of British Possessions other than those just named. These are subdivided so as to show the birthplace of the mother, whether in Nova Scotia, New Brunswick, Newfoundland, or other British Possessions. Other lines in the recapitulation of less importance than those we have cited, show the parentage when the fathers were born in Massachusetts and the mothers were born in some other specified country. The persons whose fathers and mothers were of New England birth, outside of Massachusetts,

numbered in the aggregate 212,680; and the table also shows the combinations of parentage, the father being of New England birth and the mother of some specified foreign country. There were 20,279 persons whose fathers were born in Other States and whose mothers were born in Massachusetts; 59,936 persons whose fathers and mothers were both natives of other states, outside of New England and Massachusetts; and the various combinations of parentage, the father being a native of states outside of New England and Massachusetts and the mother being a native of some specified foreign country, also appear. With respect to the persons whose fathers are of foreign birth, we find 559,635 persons whose fathers were born in Ireland and whose mothers also were Irish; 26,075 had Irish fathers and mothers born in Massachusetts; and various other combinations appear, the father being a native of Ireland and the mother of some state other than Massachusetts, or of some other specified country. The number of persons having Canadian fathers and mothers, of English extraction, is 50,327; while the number having Canadian fathers and mothers, of French extraction, is 168,264; and the Canadian English or Canadian French influence may be traced in the table through various combinations of parentage, the father being either Canadian English or French, and the mother a native of some other foreign country. Similar combinations of parentage, the father being a native of Great Britain and the mothers natives of various foreign countries, or the father being a native of some other foreign country and the mothers natives of some other specified foreign country, appear in detail in the table. The combinations are numerous, but are essential to fully present the facts.

The main body of the presentation gives them in condensed form for each city and town. Take, for example, the smallest town in the State, New Ashford, in the county of Berkshire. The details respecting this town appear on page 85. The entire population of the town comprises 116 persons. Of these, 47 had both parents born in Massachusetts; 13 in Other States; 28 had both parents native, not otherwise specified in the table; three had native fathers and foreign mothers; two, native fathers, the parentage of the mother being unknown; six, foreign fathers and native mothers; 11, both father and mother foreign, the place of birth being not otherwise specified; one, a foreign father, the place of birth of the mother being unknown; three, native mothers, the place of birth of the father being unknown; and two for whom the facts as to the nativity of both father and mother were unknown. It will be seen that the population of this little town is almost wholly of native parentage, while nearly one-half the entire number is of Massachusetts parentage. The persons of foreign parentage are so distributed that it was not deemed expedient to specify the particular country in detail in the table.

Compare this town with the city of Fall River, for which the facts appear on pages 88 and 89. Fall River is one of the most important industrial cities of the Commonwealth, and has received large accessions of population from abroad during comparatively recent years. The total population is 89,203. Of these persons, 5,837 had both parents born in Massachusetts; those who had Massachusetts fathers and mothers of New England birth numbered 1,126; fathers born in Massachusetts and mothers born in Other States, 362; fathers born in Massachusetts and mothers born in Ireland, 547; fathers born in Massachusetts and mothers born in Canada, of English extraction, 58; fathers born in Massachusetts and mothers born in Canada, of French extraction, 146; fathers born in Massachusetts and mothers born in Great Britain, 738; fathers born in Massachusetts and mothers born in British Possessions, 63. These comprise all of the persons who had fathers of Massachusetts birth. There are limited numbers whose fathers were born in New England and whose mothers were born in some foreign country. There were 1,159 persons who had fathers of New England birth and mothers born in Massachusetts; and 2,511 whose fathers and mothers were born in New England outside of Massachusetts. Various minor combinations appear in the table where either the father or the mother was of native birth. On the other hand, 19,294 persons had both father and mother born in Ireland; 1,104 had Irish fathers and mothers born in Great Britain; 23,423 had both father and mother born in Canada, of French extraction; 1,213 had fathers born in Great Britain and mothers in Ireland; 18,755, both father and mother born in Great Britain; 2,087, both father and mother born in Portugal; 1,009, both

father and mother born in Russia; and various other combinations, each comprising limited sections of the population, indicate foreign birth on the part of either father or mother, or both. If the reader wishes to ascertain the full extent of the influence of any particular nationality upon the population of Fall River, he need only combine the figures representing both fathers and mothers of the specified nationality with the figures showing either the fathers or mothers born in the specified country, although combined with some other country.

The figures for the city of Boston appear on pages 132 and 133, and the salient lines show that of the total population of the city, namely, 496,920, there were 59,313 persons who had both father and mother born in Massachusetts; 39,028, both father and mother born in New England outside of Massachusetts; 151,595, both father and mother born in Ireland; 13,104, both father and mother of Canadian birth, of English extraction; 2,144, both father and mother of Canadian birth, of French extraction; 24,923, both father and mother born in Great Britain; 26,773, both father and mother born in British Possessions; 20,708, both father and mother born in Germany; 11,354, both father and mother born in Italy; 16,927, both father and mother born in Russia; and 6,340, both father and mother born in Sweden. As in the case of nearly every other city and town in the State, other combinations appear in which, for example, the Irish, Italian, Russian, and other strains are represented by the birthplace of father or mother in combination with a father or mother of some other foreign country specified.

We introduce a condensed analysis table relating to the fathers and mothers of the persons in the State, brought forward from the recapitulation, with percentages.

Place of Birth.	Persons Born in Specified States or Countries	Persons Having Fathers Born in Specified States or Countries			Persons Having Mothers Born in Specified States or Countries		
		Native Born	Foreign Born	Total	Native Born	Foreign Born	Total

* Less than one one-hundredth of one per cent.

Considering merely the percentages shown in this table, we find that of the total number of persons, while 54.64 per cent represents the persons born in Massachusetts, only 25.51 per cent of the total number of persons had fathers and 25.97 per cent of the total number of persons had mothers who were of Massachusetts birth. Similarly, while 9.94 per cent of the population was born in other New England States, 13.14 per cent of the total number of persons had fathers and 12.93 per cent had mothers who were natives of New England outside of Massachusetts; and while 4.83 per cent of the total persons comprised those born in other states outside of Massachusetts and New England, 4.17 per cent of the total number of persons had fathers and 4.58 per cent had mothers who were of this nativity.

As to the foreign born, some of the leading lines show that 10.33 per cent of the total number of persons were born in Ireland, 24.96 per cent of the total number of persons had fathers and 24.99 per cent mothers who were of this nativity; 4.39 per cent of the total population was of French Canadian extraction, 7.53 per cent had fathers and 7.34 per cent mothers who were of this class; while natives of Italy comprise 0.62 per cent of the population, 0.91 per cent had fathers and 0.87 per cent mothers who were born in Italy. In figuring the percentages shown in this table, the number of fathers and mothers whose place of birth is given as "unknown" have not been considered.

Relating to the population of the city of Boston, we present the following condensed table:

Other Countries,	5.29	7.80	7.34

We summarize the percentages for Boston, as follows: The native born persons constitute 63.70 per cent of the total number of persons; while the persons having native born fathers constitute 32.23 per cent of the total, and those having native born mothers 32.90 per cent of the total. The number of persons born in Massachusetts represents 50.09 per cent of the total persons, while the persons having fathers of Massachusetts birth constitute 16.81 per cent of the total, and those having mothers of Massachusetts birth 17.75 per cent of the total. Of the foreign born persons, while 36.30 per cent of the total population is of foreign birth, the persons having foreign born fathers represent 67.77 per cent of the total, and those having foreign born mothers 67.10 per cent of the total. Persons born in Ireland constituted 14.40 per cent of the total persons, the persons having fathers born in Ireland comprising 33.92 per cent of the total, and those having mothers born in Ireland 33.99 per cent of the total. Persons born in British America, including Canadian English, Canadian French, and natives of the British Provinces, constituted 8.90 per cent of the total persons, the persons having fathers of such nativity 10.68 per cent of the total, and those having mothers 11.88 per cent of the total. Natives of Italy comprised 1.59 per cent of the total population of the city, the persons having fathers born in Italy 2.40 per cent of the total, and those having Italian mothers 2.33 per cent of the total. The natives of Germany comprised 2.19 per cent of the total persons, the persons whose fathers were born in Germany, 5.08 per cent, and the persons whose mothers were born in Germany, 4.55 per cent. The persons of French nativity, however, as well as the persons having fathers or mothers born in France, constituted less than one per cent of the total number of persons. In figuring the percentages shown in this second table for the city of Boston, the number of fathers and mothers whose place of birth is given as "unknown" have not been considered.

Parent Nativity of Persons 90 Years of Age and Over.

The parent nativity of persons 90 years of age and over, for the State, appears on page 179. It was considered advisable to show in detail the parent nativity of these extremely aged persons. Summarizing the facts brought out in the presentation, it may be said that 1,592 such persons were enumerated, comprising 324 males and 863 females of native birth, and 146 males and 259 females of foreign birth. Of the total number, 737 had both parents born in Massachusetts; that is, nearly one-half the total number of persons who had lived to this advanced age were not only of wholly native parentage, but were also of wholly Massachusetts parentage. Of the others, 61 had Massachusetts fathers and mothers born elsewhere, 49 of the mothers being born in New England; 221 had both parents born in New England outside of Massachusetts; 37 others had fathers born in New England and mothers born elsewhere; five had

mothers of Massachusetts birth and fathers born in Other States; four had mothers of New England birth and fathers born in Other States; 33 had both parents born in states outside of New England; five others had fathers born in Other States and mothers of unknown or foreign birth. Of those who had wholly foreign parentage, 266 had both parents born in Ireland; one had an Irish father and mother born in Great Britain; one an Irish father, the birthplace of the mother being unknown; 34 were of wholly Canadian French parentage; 45 had both father and mother born in Great Britain; 14 both parents born in Germany; and the others were of foreign nationalities, largely mixed. Out of the whole number, the facts as to parentage were unknown for but 56. It may be interesting to note the birthplace of the persons themselves. This is shown in the following table:

Of the whole number, 1,592, there were 1,187 who were native born, comprising 324 males and 863 females. Of these 858 were born in Massachusetts; 111 in New Hampshire; 79 in Maine; 37 in Vermont; 32 in Connecticut; 27 in New York; and 23 in Rhode Island.

The foreign born numbered 405, comprising 146 males and 259 females. Of these 267 were natives of Ireland; 20 were born in Canada (English); 35 in Canada (French); 24 in England; 13 in Germany; 12 in Nova Scotia; and 12 in Scotland.

Schools and School Property.

SCHOOLS AND SCHOOL PROPERTY.

PUBLIC SCHOOLS.

[In the following presentations, the school buildings are classified according to the grade or grades taught therein. The term "ungraded" has been used to designate mixed schools where pupils of several grades are taught in the same room. Unoccupied school houses, available for educational purposes, if needed, are included. If used wholly for other purposes, although originally school buildings, they have been excluded.]

Tabular Analysis.

Pages
Schools and School Property, ... 193–216

The tables relating to schools and school property present the information relating to the number and value of public school buildings, together with the value of school property contained therein, and used for educational purposes, by which is meant maps, globes, musical instruments, chemical and other scientific apparatus, and such miscellaneous books of reference as do not form a library; in a word, property or appliances used directly in instruction, not, however, including the value of furniture, which is included with that of the buildings. In addition to this, the tables show the number of buildings owned and hired for private schools, both incorporated and unincorporated, with value, if owned; and the value of private school property, with the dates of the establishment of such private schools. The facts are presented by cities and towns, with county and State recapitulations, and are for the year ending June 30, 1895, and, so far as values are concerned, present such values as they existed on that date.

In making up the returns of values, the value of land is included with that of buildings, and wherever a definite appraisal has been made by the assessors or other competent authority, it has been taken as the basis of value. Where no such appraisal has been made, the values have been estimated according to the best judgment of the school officer who made the return, using in such cases, as far as the buildings and property are concerned, the combustible value, *i. e.*, the amount which might be claimed as the amount of total loss, or required to replace the building or property, if totally destroyed by fire.

The public school buildings have been classified according to the kinds of schools held in them, well-known kinds being Kindergarten, Primary, Grammar, High, etc.; and wherever different grades are taught in the same building the fact appears by proper designation, for example, Primary-Grammar, indicating that both primary and grammar grades receive instruction in the building to which the term is applied. A school in which different grades are taught in the same room is termed "Ungraded," and this designation affixed to any building indicates that such classes are accommodated therein. There is also a separate presentation of County and State Schools. Unoccupied schoolhouses, available for educational purposes, if needed, are included in the presentations; but buildings used wholly for other purposes, although originally school buildings, have been excluded. In using the tables, reference should be made to the head-notes and foot-notes, which explain or modify certain points in the returns.

The presentation relating to public schools occupies pages 193–210, the recapitulation for the State appearing at the close. In this recapitulation it is shown that the total number of public school buildings is 3,395, valued at $37,447,411; this value, as explained, including land and furniture. The value of school property, other than buildings, land, and furniture, is $1,629,994. Under the classification of school buildings, the principal classes, exclusive of County and State Schools, are as follows, with values annexed: Primary-Grammar, 1,145 buildings, $8,987,939, property, $397,331; Grammar, 184 buildings, $6,437,904, property, $212,028; Primary, 710 buildings, $5,560,441, property, $127,621; High, 90 buildings, $3,987,175, property, $214,897; Kindergarten-Primary-Grammar, 82 buildings, $2,478,134, property, $39,719; Kinder-

garten-Primary, 61 buildings, $1,967,224, property, $30,677; High-Manual Training, 5 buildings, $1,185,696, property, $59,986; High-Latin, 11 buildings, $1,089,945, property, $76,034. The other classes include a variety of combinations made necessary by the inclusion in different buildings of grades under heads other than those named, all of which appear in detail in the table.

The County Schools comprise eight truant schools, in the counties of Berkshire, Essex, Hampden, Hampshire, Middlesex, Norfolk, Suffolk, and Worcester; total number of buildings, 11; aggregate value, $260,740; aggregate value of school property, $8,290. The State Schools include five normal schools for general instruction,—nine buildings, aggregate value, $1,012,100, property, aggregate value, $222,255; one normal art school building, $124,209, property, $3,300; and included also under this head, for the reason that the State makes an annual appropriation for its support, one school building for the feeble minded, $28,340, property, $3,199. No distinctly penal or charitable schools under County or State control are included, except schools for truants who are, of course, committed from the Courts. The total number of County and State school buildings, as classified, is 22; value $1,425,389; property, $237,044.

The information as to private schools is contained upon pages 211–216. The first recapitulation, showing total number of buildings, number owned and hired, number of rooms hired, etc., and values, for the State and counties, will be found upon pages 213 and 214. The total number of school buildings occupied by private schools is 746; 605 being occupied by incorporated schools, and 141 by those which are unincorporated. The total number owned is 692, of which 598 belong to incorporated institutions; the total number hired, 54, seven being used by incorporated institutions. Besides these school buildings, there are private schools occupying 395 hired rooms, 35 of which are in connection with incorporated schools. There are nine in churches, chapels, etc., two being incorporated; and there are 28 private schools in dwelling houses. The total value of the buildings owned is $17,941,825, sub-divided as follows: Incorporated, $16,759,850, unincorporated, $1,181,975. The value of school property in the aggregate is $1,944,821, sub-divided as follows: Incorporated, $1,665,745, unincorporated $279,076. There were no private schools reported for the county of Barnstable, every other county being represented. The term "private school," as used in the Census, is a general one, and includes all educational institutions in which private instruction is given, as distinct from schools maintained at public expense in which tuition is free. Under this head, therefore, are included colleges and universities, as well as institutions more popularly known as schools.

The total number of schools, under a classification showing the different kinds, and whether incorporated or unincorporated, may be seen in the following table:

Classification of Private Schools.	Incorporated Schools	Unincorporated Schools	Totals
Private schools, general instruction,	62	143	205
Kindergartens,	3	29	32
Colleges and universities,	18	1	19
Academies, seminaries, and institutes,	42	7	49
Theological schools, seminaries, and institutes,	6	–	6
Industrial and manual training schools,	7	10	17
Schools, asylums, and institutes for the dependent and afflicted classes,	6	5	11
Schools, colleges, and conservatories of music, art, elocution, and oratory,	3	16	19
Schools of languages,	–	11	11
Stenographic schools and business colleges,	2	29	31
Totals,	149	251	400

Private schools for general instruction number 205; 62 being incorporated. There are 32 kindergartens, three of which are incorporated; 19 colleges and universities, only one being unincorporated;* 49 academies, seminaries, and institutes of a general character, 42 being incorporated; six schools, seminaries, and institutes for instruction in theology, all of which are incorporated; 17 industrial and manual training schools, seven of which are incorporated; 11 schools, asylums, and institutes for the dependent and afflicted classes, six of which are incorporated; 19 schools, colleges, and conservatories of music, art, elocution, and oratory, three of which are incorporated; 11 schools of languages, all unincorporated; and 31 stenographic schools and business colleges, two of which are incorporated.

The following table shows the manner in which the various private schools are supported:

Means of Support.	Number Supported as Specified
Tuition fees only,	228
Tuition fees and income from endowment,	27
Tuition fees and other income, except from endowment,	37
Tuition fees, income from endowment, and other sources,	10
Income from endowment only,	14
Income from endowment and other income, except tuition fees,	5
Voluntary contributions and donations,	69
National and State grant,	1
Other sources of income,	9
Total,	400

In making a classification showing the manner of support, a variety of combinations was found necessary. The salient lines are: tuition fees only, the number of schools thus supported being 228; tuition fees and income from endowment, 27; tuition fees and other income, except from endowment, 37; voluntary contributions and donations, 69; and income from endowment only, 14.

The next table shows the number of private schools which have endowment, the amount of such endowment in the aggregate, by counties, and the total income of private schools, also aggregated by counties.

The State, and Counties.	Number having Endowment	Amount of Endowment	Total Income of Private Schools
THE STATE.	70	$23,608,759	$5,716,110
Berkshire,	1	846,000	118,102
Bristol,	3	237,016	97,572
Dukes,	1	6,563	3,280
Essex,	7	1,656,785	301,332
Franklin,	5	468,877	137,564
Hampden,	4	142,228	154,910
Hampshire,	8	3,196,853	600,953
Middlesex,	11	11,513,236	1,646,743
Nantucket,	1	50,000	2,600
Norfolk,	6	1,233,930	382,981
Plymouth,	4	369,993	27,979
Suffolk,	11	2,306,110	1,771,375
Worcester,	8	1,581,168	470,719

* See note on page 221, *post*.

The total number of private schools in the State having endowment is 70, the total amount of endowment being $23,608,759. The total income received in private schools from all sources for the year under consideration is $5,716,110. The largest endowment fund appears in connection with the private institutions in Middlesex County, namely, $11,513,236, Hampshire County standing next with $3,196,853. The other counties in which endowment funds in excess of one million dollars are found are Suffolk, $2,306,110; Essex, $1,656,785; Worcester, $1,581,168; and Norfolk, $1,233,930.

The following table exhibits the amount of endowment and the aggregate income of private schools, by classes:

Classification.	Number reporting Endowment	Amount of Endowment	Number reporting Income	Aggregate Income
Private Schools, General Instruction,	9	$607,405	205	$1,150,947
Incorporated,	6	483,264	62	484,306
Unincorporated,	3	124,141	143	666,641

Incorporated,	–	–	2	56,040
Unincorporated,	–	–	29	183,508
Totals,	70	23,608,759	400	5,716,110
Incorporated,	64	23,053,083	149	4,629,570
Unincorporated,	6	555,676	251	1,086,540

Of the private schools, general instruction, there are nine which report endowment, the aggregate amount being $607,405; the entire number of such schools, namely, 205, reporting an aggregate income of $1,150,947. There are two kindergartens having

endowment, the aggregate amount being $201,441, the aggregate income of the 32 kindergartens being $34,534. There are 14 colleges and universities reporting endowment, the aggregate amount being $15,471,822. The total number of colleges and universities reported is 19, and the aggregate income for institutions of this kind is $2,437 131.* Of institutions classed as "Academies, Seminaries, and Institutes," there are 32 having endowment, the aggregate amount being $5,225,010. The whole number of institutions of this kind is 49, the aggregate income being $1,103,828. There are four endowed theological schools, seminaries, and institutes, the aggregate amount of endowment being $969,604; the aggregate income of the six institutions of this kind being $104,543. The number of industrial and manual training schools reporting endowment is five, the aggregate endowment being $287,831, while the aggregate income of the 17 schools of this kind is $79,854. There are three endowed schools, asylums, and institutes for the dependent and afflicted classes, the aggregate amount of endowment being $844,246. The total number of such institutions is 11, and the aggregate income $202,713. Of schools, colleges, and conservatories of music, art, elocution, and oratory, there is one reporting endowment to the amount of $1,400, while the 19 institutions of this kind report an aggregate income of $340,272. There are no endowed schools of languages, the aggregate income of the 11 institutions thus classed being $22,740; and there is no endowed institution among those classed as "Stenographic Schools and Business Colleges," while the aggregate income of the 31 institutions under this head is $239,548. The aggregates shown in this table correspond, of course, with those in the previous table, the 70 endowed institutions showing an aggregate endowment of $23,608,759, while the 400 private schools show a total income of $5,716,110. The table shows, under each of the heads designated, the amount of endowment and the amount of income for the incorporated and unincorporated institutions separately.

The presentation closes with data showing the date of establishment of private schools, for the State. From this presentation, the following table has been prepared, showing the number established in each decade:

Decades of Years.	Private Schools, General Instruction	Kindergartens	Colleges and Universities	Academies, Seminaries, and Institutes	Theological Schools, Seminaries, and Institutes	Industrial and Manual Training Schools	Schools, Asylums, and Institutes for the Dependent and Afflicted Classes	Schools, Colleges, and Conservatories of Music, Art, Elocution, and Oratory	Schools of Languages	Stenographic Schools and Business Colleges

* The unincorporated college is thus classified on account of the name which it bears, and which is applied to it under an accepted definition of the word "college." It should be explained, however, that, as appears from the amount of its income, it is not comparable as to size or in kind with the other institutions included under the head of "Colleges and Universities."

Of the whole number of private schools, 17 were established prior to 1821; these include two colleges, one institution classified as an industrial and manual training school, and 14 under the head of academies, seminaries, and institutes. The other schools which were established prior to 1851 number 22, including four private schools for general instruction, four colleges and universities, seven under the head of academies, seminaries, and institutes, one in the class "theological schools, seminaries, and institutes," one industrial and manual training school, three institutes for the dependent and afflicted, and two business colleges. The total number of private institutions now existing which were established prior to 1851 is, therefore, 39. The number established in the 20 years 1851 to 1870, inclusive, was 56; 77 others came into existence in the next decade; 143 others in the decade 1881 to 1890; and 85 others in the five years 1891 to 1895, inclusive.

The following table presents a comparison of the data relating to the number of private schools for the years 1885 and 1895. In preparing this table, the classification of schools has been somewhat condensed from the classification used in the main presentation.

Classification.	1885	1895
Private schools, general instruction,	89	205
Kindergartens,	28	32
Colleges and universities,	17	19
Music, art, oratory, and languages,	14	30
Commercial and business,	18	31
Academies, seminaries, etc.,	171	72
For the dependent and afflicted,	11	11
Totals,	348	400

It will be seen that the total number of private schools returned in 1885 was 348, increasing to 400 in 1895. Those denominated private schools for general instruction numbered 89 in 1885 and 205 in 1895. On the other hand, the number of academies, seminaries, etc., which numbered 171 in 1885, numbered only 72 in 1895. Part of this decline is no doubt due to a slightly different classification adopted in 1895, which may have carried a certain number of institutions previously thus denominated, to the class termed "Private schools, general instruction."

The final table presents a comparison of the data relative to school buildings and values, of both public and private schools, for the years 1875, 1885, and 1895.

Classification of Schools.	Number of School Buildings			Value of —	
	Total	Owned	Hired	Buildings Owned	School Property
1875.					
Public Schools,	3,317	3,317	-	$18,972,086	$937,725
Private Schools,	303	276	27	$4,073,608	$344,171
Incorporated,	131	130	1	3,809,983	316,470
Unincorporated,	172	146	26	263,625	27,701
1885.					
Public Schools,	3,439	3,439	-	$23,222,781	$1,042,428
Private Schools,	541	447	94	$9,717,327	$1,652,508
Incorporated,	382	367	15	8,808,557	1,489,230
Unincorporated,	159	80	79	908,770	163,278

Classification of Schools.	Number of School Buildings			Value of—	
	Total	Owned	Hired	Buildings Owned	School Property
1895.					
Public Schools, ...	3,395	3,395	–	$37,447,411	$1,629,994
Private Schools, ...	746	692	54	$17,941,825	$1,944,821
Incorporated, ...	605	598	7	16,759,850	1,665,745
Unincorporated, ...	141	94	47	1,181,975	279,076

The total number of public school buildings returned in 1875 was 3,317; the number returned in 1895 was 3,395, the increase being immaterial. In fact, a decline appears between 1885 and 1895. This, however, does not indicate a decrease in school accommodations, but simply a substitution of larger and better buildings for those which formerly existed. As towns grow larger consolidations take place, and the actual number of buildings therefore declines; but a comparison of values shows a very great increase, indicating a corresponding increase in the character of the structures devoted to school purposes. For example: The total value of the public school buildings in 1875 was $18,972,086, rising to $23.222,781 in 1885. In the decade ending in 1895, however, this value has risen to $37,447,411, an increase of 61.25 per cent in 10 years. The value of public school property which was returned as $937,725 in 1875, now stands at $1,629,994.

The number of buildings occupied by private schools was 303 in 1875, rising to 746 in 1895. The number occupied by incorporated private schools was 131 in 1875, and had become 605 in 1895. The total value of buildings owned and used for private schools was $4,073,608 in 1875, rising to $17,941,825 in 1895. The increase is principally in the buildings occupied by incorporated private schools, the value of such buildings being $3,809,983 in 1875, $8,808,557 in 1885, and $16,759,850 in 1895, an increase of 90.27 per cent in the last 10 years. These include, as previously explained, the buildings occupied by colleges and universities.

The total value of all school buildings, *i. e.*, both public and private, in 1895, is $55,389,236, as against $23,045,694 in 1875; and the total value of school property, $3,574,815, as against $1,281,896.

Libraries and Reading Rooms.

LIBRARIES AND READING ROOMS.

In the presentations which follow, the statistics relating to the number of libraries, the number, value, and circulation of books, the amount of endowment, income, etc. (for libraries), and the number of works of reference, newspapers and periodicals, the seating capacity, and the number of persons using reading rooms (for reading rooms), are for the Census year ending June 30, 1895.

In the presentation relating to libraries the following classification is used:

Secular.	Art	State
City public	Law	State department.
Town public	Medical	
Other public	Hospital	*Religious.*
Public school	Association	Church
Private school	Club	Church and Sunday school
College	Institution	Sunday school
Science	Private circulating	Association
		Theological.

By "Other public" is meant libraries that derive their support from private sources, but which are open for the use of the public in the same way as city and town libraries. By "Institution" is meant libraries connected with prisons, houses of correction, and other penal and charitable institutions, and maintained for the use of the inmates thereof. In other respects the designations are considered sufficiently explicit without particular explanation. A similar classification is also shown on page 279 for reading rooms for the State.

Presentations under the above classification are given, showing the date of establishment of the various libraries and reading rooms.

The following named towns made no return of libraries: Washington, in the county of Berkshire; Seekonk, in the county of Bristol; and Dracut, in the county of Middlesex.

A presentation of libraries by particular name is not given in this volume on account of considerations of space, but such list can at any time be made up from information in the office, and will be supplied upon request. The same statement applies to reading rooms.

No foot-notes have been made of omission to report income for Sunday school libraries, the inference being that such libraries had no source of income other than miscellaneous contributions from scholars.

The value returned for books is the combustible value, that is, the amount that might be claimed from an insurance company to replace them if destroyed by fire.

The information returned concerning the amount of endowment funds, income, etc., for reading rooms is not shown in the tabular presentations, but is considered in the analysis.

LIBRARIES AND READING ROOMS.

READING ROOMS: NUMBER, READING MATTER, ETC.

[In this presentation, the reading rooms returned for each city and town are secular reading rooms, unless otherwise specified. "Number reporting," signifies the number of reading rooms from which a return was received of the information specified.]

Counties, Cities, Towns, and Classification of Reading Rooms.	Number of Reading Rooms	Different Newspapers and Periodicals		Works of Reference		Greatest Seating Capacity		Persons Using Reading Rooms

TABULAR ANALYSIS.

Pages
LIBRARIES AND READING ROOMS, ... 225–282

The returns relating to libraries and reading rooms form the basis of the presentations contained on pages 225–282. The information concerning libraries is first presented, by towns, followed by a recapitulation for the counties and the State, which will be found on pages 265–269.

Libraries.

It appears from the figures on page 269 that for the Census year, 1895, there were 2,028 libraries, including 687 secular and 1,341 religious libraries. It will be understood that these are all public or quasi public institutions; that is, they are either open to the public at large or in use by associations, clubs, and institutions, or are private circulating libraries which are used by the public on payment of fees. Libraries which are owned by individuals for their personal use are, of course, not included. The total number of volumes contained in the secular libraries is 6,511,700, and in the religious libraries, 856,064. These figures include manuscripts, pamphlets, and bound books, their aggregate estimated value being $9,873,760, of which $9,363,668 is the value of the books in the secular libraries, and $510,092 the value reported from the religious libraries. The circulation for home use from secular libraries during the Census year was 6,803,315 volumes, and from the religious libraries 1,657,961 volumes. The number of libraries having endowment funds is 292, of which 210 are secular and 82 religious libraries. The total amount of endowment is $4,424,498, and the income for the year from all sources $1,002,339. The endowment and income as returned by classes are as follows: Secular, endowment, $4,320,073; income from all sources, $976,853; religious, endowment, $104,425; income from all sources, $25,486.

Of the total number of libraries, 293 have reading rooms connected; of these, 248 are secular and 45 religious libraries. Of the secular libraries, the city public, town public, and other public libraries comprise in the aggregate the largest part, the number of city public libraries being 46, town public 303, and other public 16. The number of books in the city public libraries is 1,797,113, having an estimated value of $3,645,967; and there were circulated for home use from these libraries, during the Census year, 3,287,385 volumes. On the other hand, the town public libraries number 303, and contain 1,496,747 volumes, having an estimated value of $1,345,856. These libraries circulated for home use during the Census year 2,760,838 volumes. There were 16 other public libraries, having in the aggregate 98,129 volumes, valued at $82,020. The circulation of these libraries for home use aggregated 123,526 volumes for the Census year. Of the city public libraries, 25 reported an endowment aggregating $1,400,373; and of the town public libraries, 123 have an endowment, aggregating $1,065,220. Of the other public libraries, nine reported an endowment, aggregating $537,379. The income from all sources of the city public libraries for the Census year was $530,070; of the town public libraries, $190,333; and of the other public libraries, $9,926. Of the city public libraries, 43 have reading rooms, while there are 130 reading rooms connected with the town public libraries, and nine reported from other public libraries. The private circulating libraries, 44 in number, reported in the aggregate 82,467 volumes, valued at $33,860; the circulation from these libraries for home use during the Census year being 151,334 volumes.

Of the religious libraries, those belonging to Sunday schools form by far the largest number, the aggregate being 1,254, containing 585,709 books, valued at $297,651. The aggregate circulation for home use reported from the Sunday school libraries for the Census year was 1,590,175 volumes. Of the Sunday school libraries, 71 reported an endowment aggregating $40,874; and the aggregate income from all sources for libraries of this class for the Census year was $14,231.

The presentation on page 269 shows, in connection with the number of libraries, the total number of hours open weekly, and the average hours weekly per library. The average number of hours open weekly for all the secular libraries, without regard to kind, is 27.70. The city public libraries are open, however, on an average, 57.61 hours per week; the town public 15.10 hours per week; and the other public libraries 18.50 hours per week. Of course, the religious libraries being mainly confined to those connected with Sunday schools, are not open, on an average, many hours during the week. For all classes of religious libraries, the average number of hours weekly is 2.73, but for association and theological libraries, classed under the head of religious, the average hours weekly, respectively, are 41.46 and 63.50.

The presentation, pages 270-273, shows the years in which the libraries of the various classes were opened, and enables the reader to note the development of the library system of the State. From the recapitulation by decades, for the State, contained on page 273, we may note that of the secular libraries in existence in 1895, the first city public library was founded in the decade 1841 to 1850; nine others in the decade 1851 to 1860; 13 in the decade 1861 to 1870; 16 in the decade 1871 to 1880; three in the decade 1881 to 1890; while four have been established since 1890. The establishment of the town libraries, by decades, is as follows: 1811 to 1820, one; 1831 to 1840, one; 1841 to 1850, three; 1851 to 1860, 25; 1861 to 1870, 42; 1871 to 1880, 87; 1881 to 1890, 55; and in the five years 1891 to 1895, 88. Similar information relating to the other libraries, both secular and religious, may be obtained from the presentation and recapitulation.

For the purpose of comparing the returns for 1895 with those for 1885, we introduce the following analysis table:

Classification.	1885			1895		
	Secular Libraries	Religious Libraries	Total Libraries	Secular Libraries	Religious Libraries	Total Libraries
Total number of libraries,	703	1,668	2,371	687	1,341	2,028
Number of Books.						
Libraries making return,	702	1,666	2,368	687	1,341	2,028
Total number of books (includes manuscripts, pamphlets, and bound books),	4,828,056	1,048,800	5,876,856	6,511,700	856,064	7,367,764
Value of Books.						
Libraries making return,	689	1,664	2,353	660	1,313	1,973
Value of books,	$5,312,774	$576,178	$5,888,952	$9,363,668	$510,092	$9,873,760
Circulation.

Circulation for home use,	5,706,435	2,912,633	8,619,068	6,803,315	1,657,961	8,461,276
Amount of Endowment Fund.						
Libraries making return,	140	60	200	210	82	292
Amount of fund,	$3,214,754	$66,732	$3,281,486	$4,320,073	$104,425	$4,424,498
Income from all Sources.						
Libraries making return,	144	59	203	510	419	929
Income from all sources,	*$161,938	*$2,283	*$164,221	$976,853	$25,486	$1,002,339

* Income from endowment fund only.

The total number of libraries returned in 1895, is, as we have stated, 2,028, while the number returned in 1885 was 2,371. These figures indicate a decline in the number of libraries. But the total number of books, including manuscripts, pamphlets, and bound books, reported in 1895 was 7,367,764, as against 5,876,856 returned in 1885. Both the secular and religious libraries show decline in numbers since 1885. The value of books returned, as well as the number of volumes, shows an increase, however, the aggregate value reported in 1895 being $9,873,760, as against $5,888,952 in 1885. This increase, it will be seen, is in the value of books held in secular libraries, the aggregate value reported being $9,363,668, in 1895 as against $5,312,774 in 1885; while the corresponding figures for religious libraries are $510,092 in 1895 as against $576,178 in 1885, a slight decline in the later year. The aggregate circulation for home use reported from all the libraries in 1895 was 8,461,276 volumes, showing a slight decline from the circulation reported for the year 1885 which was 8,619,068 volumes. There has been an increase in the endowment fund held by the libraries, the aggregate amount reported in 1895 being $4,424,498, as against $3,281,486 reported in 1885. The income from all sources was not reported for 1885, and therefore comparative figures as to income, in the aggregate, do not appear in the table.

We have pointed out that the total number of libraries, as well as the number of secular libraries and religious libraries considered separately, shows a decline since 1885. The following condensed analysis table presenting a comparison between 1895 and 1885, by classes of libraries, shows just where this decline has taken place:

Classification.	Number of Libraries		Increase (+) or Decrease (−) in 1895
	1885	1895	
Secular.	703	687	−16
City public,	32	46	+14
Town public,	209	303	+94
Other public,	7	16	+9
Private circulating,	117	44	−73
Other libraries,	338	278	−60
Religious.	1,668	1,341	−327
Church,	33	23	−10
Church and Sunday school,	13	13	*=
Sunday school,	1,583	1,254	−329
Other libraries,	39	51	+12

* No change.

The total number of secular libraries returned in 1895 is 687, or 16 less than the number returned in 1885; but the decline is greatest in the number of private circulating libraries, only 44 such libraries being returned in 1895, as against 117 in 1885. City public libraries have increased in number from 32 to 46; town public libraries from 209 to 303; and other public libraries from 7 to 16. The decline in the number of libraries, in the aggregate, is therefore due to the substitution of the city and town public libraries for the private circulating libraries. The increase in the number of city and town public libraries will also largely account for the decline in the number of religious libraries, which dropped from 1,668, as reported in 1885, to 1,341, in 1895; the Sunday school libraries alone decreasing in number from 1,583 to 1,254.

The following condensed statement, based upon information contained in the returns, shows the manner in which the libraries are supported:

Means of Support.	Number
Secular.	
City Public.	46

Of the city public libraries, 25 are supported only by appropriations made by the City Government, that is, by taxation only; while 21 have, besides city appropriations, other sources of income. Of the town public libraries, 130 are supported by town appropriations only; 121 others by town appropriations and other income, largely from the proceeds of the dog tax, which by statute is devoted either to libraries or schools as the town may elect. The other public libraries, whether classed as "town public" or "other public," have various sources of income, 20 of the town public and eight of the other public libraries reporting private funds as the only source of income, while four

of the town public libraries are supported by private funds and other income, apart from town appropriations. Twelve of the public school libraries are supported by private funds, while most of the others rely on municipal appropriations, part of the appropriation for school purposes being used in this way, no doubt. Contributions of various kinds, fees, etc., are the principal sources of income in the other secular libraries, except the institution libraries which are mainly supported by public appropriations; while contributions are relied upon to support the religious libraries to a very large extent.

Reading Rooms.

The presentations relating to reading rooms are contained on pages 274-282. As in the case of the information relating to libraries, the statistics are presented by towns, with county and State recapitulations, the first recapitulation appearing on page 278. The total number of reading rooms reported for the State is 330. Of these, 314 report newspapers and periodicals on file, numbering 15,573, and 180 report works of reference, numbering in the aggregate 187,563 volumes. The aggregate seating capacity reported from reading rooms is 16,021, 301 reading rooms making returns. The number of reading rooms reporting data as to persons using the rooms is 199, the average daily number being 11,244. Of the total number of reading rooms, 270 are classed under the head of secular and 60 as religious.

The recapitulation on page 279 shows the various secular reading rooms in detail, from which it appears that those classed as city public, town public, and other public, taken together, outnumber all others. There are 50 city public, 132 town public, and nine other public reading rooms. The average daily number using the city public reading rooms, based upon returns from 33 such rooms, is 3,732; while 69 returns from town public reading rooms show an average number using the rooms daily of 2,516. The number of reading rooms classed as religious, in the aggregate, is as stated, 60; returns from 45 of these show the average number of persons daily using the rooms to be 2,047.

Of the secular reading rooms, as shown by another presentation on page 279, 248 are connected with libraries, and 22 not thus connected. Of the religious reading rooms, 45 are connected with libraries, and 15 are not thus connected. Therefore, of the 330 reading rooms in the State, 293 are connected with libraries, and 37 are not thus connected.

The table on page 280 shows for the State, in connection with the total number of reading rooms, the number of hours open weekly, and the average hours weekly per reading room. In reading rooms of the secular class, taken together, the average number of hours open weekly is 39.23; while for the religious reading rooms, the average is 67.10. This last average is increased by the single theological reading room connected with a theological library, which is open, on an average, 112 hours per week. The average number of hours open weekly for the city public reading rooms, as a class, is 59.96, and for the town public reading rooms, 23.49.

The presentation, pages 280–282, shows the years in which the reading rooms were opened, by classes, the recapitulation appearing on the last named page. From this recapitulation it will be seen that the first city public reading room was opened in the decade 1851 to 1860, in which period five such reading rooms were established; one town public reading room was also established in that decade. The establishment of city public reading rooms, by decades, subsequent to 1860, is as follows: 1861 to 1870, 9; 1871 to 1880, 13; 1881 to 1890, 15; and subsequent to 1890, 8. The establishment of town public reading rooms subsequent to 1860, by decades, is as follows: 1861 to 1870, 17; 1871 to 1880, 29; 1881 to 1890, 51; and subsequent to 1890, 34.

The following analysis table enables a comparison to be made between the returns for 1895 and those for 1885:

Classification.	1885			1895		
	Secular Reading Rooms	Religious Reading Rooms	Total Reading Rooms	Secular Reading Rooms	Religious Reading Rooms	Total Reading Rooms

* Average daily number using. † Income from endowment fund only.

The total number of reading rooms returned in 1895 is 330, showing a considerable increase since 1885, in which year the total number reported was 194. The number of religious reading rooms returned in 1895 is 60, as against 22 in 1885; while the number of secular reading rooms reported in 1895 is 270, as against 172 in 1885. The aggregate number of newspapers and periodicals reported in 1895 is 15,573, 314 reading rooms making returns of this class of literature; while the aggregate number reported in 1885 was 8,316, 179 reading rooms making the returns. The number of reading rooms reporting works of reference in 1895 is 180, the aggregate number of volumes being 187,563, as against 9,332 reported in 1885 from 66 reading rooms. No comparative figures appear as to value of reference books. The number of reading rooms making returns as to the number of persons using the rooms is 199 in 1895 while 119 made returns in 1885. The returns, however, were not made on the same basis in each of these years, the figures for 1895 representing the average number using the rooms daily, namely, 11,244, while the returns in 1885 represent the total number using the rooms during the year, namely, 2,107,260. As the reading rooms are not open continuously during the year, and vary very much with respect to the number of days on which they are open, it is impossible to obtain an accurate figure respecting the total number of persons using the rooms during the year 1895. The aggregate amount of endowment fund returned from the reading rooms in 1895 is $39,605, as against $32,012 in 1885; the number of reading rooms reporting such a fund being nine in the latter, as against seven in the former year. Comparative figures as to income are not possible, as the income returned in 1885 was simply that derived from endowment funds, while that returned in 1895 is total income from all sources.

The following condensed analysis table will enable the reader to determine the increase in the number of reading rooms, by classes:

Classification.	Number of Reading Rooms		Increase (+) or Decrease (−) in 1895
	1885	1895	
Secular.	172	270	+98
City public,	31	50	+19
Town public,	59	132	+73
Other public,	5	9	+4
Other reading rooms,	77	79	+2
Religious.	22	60	+38
Church,	1	2	+1
Church and Sunday school,	—	1	+1
Sunday school,	—	13	+13
Other reading rooms,	21	44	+23

The number of secular reading rooms has risen from 172 in 1885 to 270 in 1895, and the number of religious reading rooms from 22 to 60. The city public reading rooms have risen from 31 to 50; town public reading rooms from 59 to 132; other public reading rooms from five to nine; and other reading rooms from 77 to 79. There was one church reading room in 1885, and two were reported in 1895. One church and Sunday school reading room and 13 Sunday school reading rooms were reported in 1895, but no corresponding rooms in 1885. The number of other reading rooms classed as religious has risen from 21 in 1885 to 44 in 1895.

Defective Social and Physical Condition.

Defective Social and Physical Condition: By Towns.

On the Basis of Persons.

DEFECTIVE SOCIAL AND PHYSICAL CONDITION.

The first presentation for defective social and physical condition is on the basis of *persons*, and includes all persons who on May 1, 1895, were socially or physically defective. It includes three classes: Prisoners and Convicts, Homeless Minors and Paupers, and all persons who were suffering from acute or chronic disease on May 1, 1895, or who were physically defective on that day.

By Prisoners are meant those persons who are awaiting trial for an alleged offence; held as witnesses; serving time in lieu of fines; etc. They are found only in institutions; usually in town lock-ups, city police stations and prisons, and county jails. Prisoners may not, however, be residents of the city or town in which they are found. By Convicts are meant those persons who have been tried, convicted, and sentenced to imprisonment for a specified term, or to suffer the death penalty. They are found only in institutions, but, like prisoners, may not be residents of the city or town in which they are found.

Homeless Minors include all persons under 21 years of age wholly or mainly supported by public charity. They also include minors in truant schools and other reformatory institutions. Such persons, although having committed offences and having been committed to such institutions, are not considered convicts, but are more properly classified under homeless minors. Under this head are included persons in private families as well as in institutions. Paupers include those persons 21 years of age and over wholly or mainly supported by public charity. They are found in private families and in institutions.

In this presentation a person is counted but once, notwithstanding the fact that three or more defective physical conditions may be attributed to him. The information is given for males, females, and both sexes by towns, followed by a county and two State recapitulations. The towns are arranged alphabetically under their respective counties. Under the classification for each town, the persons having defective social conditions, but who are able-bodied, come first; then follow the persons having but one defective physical condition, those having two, three, etc.

A head-note precedes each town showing. This gives the names of the institutions returned by the enumerators as containing persons socially or physically defective. It will be seen by this that it is not our purpose to present an accurate and complete list of all the public and private institutions in each city and town; but only those, as before stated, that were returned to us as containing persons having defective social and physical conditions are included.

The presence of prisoners in a city or town, not credited with a jail or house of correction, may be accounted for by the fact that we have omitted from our list of institutions police stations and lock-ups where, as above stated, the prisoners were doubtless confined. Paupers will be found in a few towns where no almshouses are reported. These persons are boarded out in private families at the expense of the towns.

It will be seen by the second State recapitulation that the males and females, classified as in the preceding showings according to conditions, have been subdivided into native born and foreign born.

We subjoin a few illustrations of the proper manner of reading town, city, county, and State showings: We find that in the town of Lee (page 301), there were 13 prisoners returned who were able-bodied, and one who had a chronic disease; included in the convicts reported in the city of New Bedford (page 306), there were 155 able-bodied, two had a chronic disease, one was lame, etc.; of the homeless minors returned from the county of Essex (pages 362 and 363), 416 were able-bodied, five were idiotic, one was both lame and epileptic, etc.; of the whole number of paupers returned for the State (pages 371–373), 2,491 were able-bodied, 96 had acute diseases, 53 had chronic diseases and were insane, two were paralytic, epileptic, and insane, etc.

TABULAR ANALYSIS.

Pages

DEFECTIVE SOCIAL AND PHYSICAL CONDITION: BY TOWNS. ON THE BASIS OF PERSONS, ... 293–379

The statistics relating to those persons within the Commonwealth who were found to be either physically or socially defective, or both, are worth careful and serious consideration. In the preceding presentation, such details are presented as permit this consideration for the various cities and towns, and for the State as a whole, upon the basis of persons; that is, each person has been included but once, whether or not subjected to more than one form of disability. The explanatory matter contained in the note upon page 295 should be read in connection with the figures, and some of the statements contained in it are repeated in this analysis, which is confined to a brief summary of the leading facts appearing in the recapitulation for the State by native and foreign born, pages 373–378, and in the recapitulation by classes and classified totals, on page 379.

It will be seen that the persons subjected to defective social and physical conditions numbered in the aggregate 65,759; or, the population of the State being 2,500,183, about three in every 100 of the total population. Of these persons, 38,735 were males and 27,024 females; 46,596 being native born and 19,163 foreign born.

The socially defective persons include four classes, namely, prisoners, convicts, homeless minors, and paupers. Each of these terms requires definition in order to show exactly the sense in which it is used in this report, and to discriminate clearly the persons included under it. Prisoners include persons in confinement who are awaiting trial for an alleged offence; held as witnesses; serving time in default of payment of fines; etc. These persons are found in town lock-ups, police stations, county jails, etc. As will be seen from the description, they are not always guilty persons. The term "convicts," however, includes all persons who have been tried, convicted, and sentenced to an imprisonment for a specified term, or to suffer the death penalty. Like the prisoners they are found only in penal institutions, and, as is also true with reference to the prisoners, may not have been, and in many cases were not, residents before their conviction of the city or town in which they were enumerated.

The term "homeless minors" is used in a somewhat arbitrary and conventional sense. Under it are included all persons under 21 years of age wholly or mainly supported by public charity, and also minors in truant schools and other reformatory or quasi-reformatory institutions. These last-named persons, although guilty of minor offences, and committed to the institutions by the Court, are not, it will be seen, termed convicts, but are classified as homeless minors.* Aside from the distinction which may be properly made between the minors who have been incarcerated for various light offences or misdemeanors, and the convict class, this classification was followed in the

* On the other hand, there are 112 prisoners and 881 convicts who are under 21, and who are therefore minors, but, owing to the gravity of the offences charged against them, or other qualifying circumstances differentiating them from the homeless minors as defined herein, they are properly classed as prisoners or convicts.

Census of 1885, and for that reason had sufficient justification in the present report. Under the head of homeless minors, as defined, are necessarily included persons in private families as well as in institutions. Actually, of course, they have temporary homes either in such families or institutions, but are homeless with respect to the lack of their own family home. So far as they are recipients of charity support they are in a condition of pauperism, but, being minors and therefore in a special sense a distinct class, they are not in this presentation termed paupers, which designation applies only to persons 21 years of age and over, wholly or mainly supported by public charity in private families or in institutions.

The physically defective persons include those having diseases, either acute or chronic, the maimed, lame, bedridden, paralytic, epileptic, insane, idiotic, deaf, dumb, deaf and dumb, blind, or subject to other defective physical conditions. Some of these persons are also socially defective, and are found in one of the four socially defective classes previously defined. Others are physically defective only. The various physical defects are also interwoven with one another, the same person having more than one kind of disability. But, as previously mentioned, in this first presentation, each individual is represented but once in the figures, although the various defective social or physical conditions to which each individual is subjected plainly appear.

It is therefore impossible in this presentation to show, for example, the whole number of insane or the whole number of paralytic persons out of the total of 65,759, inasmuch as some of the paralytic are also insane or vice versa. So, too, some of the prisoners or other social defectives are insane or paralytic, and the designations as to persons bear no definite relation to the designations as to conditions. The second presentation which will be given hereinafter, based upon conditions, rather than persons, will enable the reader to determine the number of persons subjected to each of the specified conditions.

In this subsequent presentation, of course, each group of conditions will be separately classed; for example, insane, including all the insane, without regard to any other defect; paralytic, including all the paralytic, and so on. Manifestly, each individual will appear more than once in such a presentation, for the reason that the same individual, as stated, is in some cases the subject of more than one defective condition.

Referring to the recapitulation which begins on page 373, we find summarized first the persons in the State having defective social and defective physical conditions. We shall merely cite the aggregates, and for convenience bring them forward in the following analysis table:

Classification.	Males			Females			Both Sexes		
	Native Born	Foreign Born	Total	Native Born	Foreign Born	Total	Native Born	Foreign Born	Total

Other defective physical contions only,	546	144	690	331	104	435	877	248	1,125
Physical defects specified, in various combinations,	941	209	1,150	501	155	656	1,442	364	1,806

The prisoners number in the aggregate 1,378 and the convicts 6,042. Of the prisoners, 41 are physically defective, and of the convicts, 262 are found in the same class. With respect to nativity of the prisoners, 748 are native born and 630 foreign born; of the convicts, 3,783 are native born and 2,259 foreign born. On the basis of sex, 1,200 prisoners are males and 178 females, while 5,199 convicts are males and 843 females.

The homeless minors number in the aggregate 5,424, of whom 876 are physically defective; only 510 are foreign born; while 3,269 are males and 2,155 females. Of the paupers, numbering in the aggregate 11,054, there are 8,563 physically defective; 5,845 native born; 5,209 foreign born; 5,631 males; and 5,423 females. The term "native born," it will be understood, includes all persons born in this country, without regard to whether the parentage of such persons was native or foreign.

The summary relating to persons having defective physical conditions, but not defective social conditions, that is, not including prisoners, convicts, homeless minors, or paupers, is next presented in the recapitulation, and the aggregates have also been brought forward in the preceding table. Such persons number 41,861; 31,306 being native born and 10,555 foreign born. The males number 23,436 and the females 18,425. By classes, showing the especial defect to which these persons were subjected, the aggregates are as follows: Acute diseases only, 2,493; chronic diseases only, 13,428; maimed only, 2,810; lame only, 6,665; bedridden only, 243; paralytic only, 2,492; epileptic only, 750; insane only, 1,510; idiotic only, 936; deaf only, 3,818; dumb only, 87; deaf and dumb only, 757; blind only, 2,941; other defective physical conditions only, 1,125; afflicted with the physical defects specified, in various combinations, that is, having more than one of the physical defects named (the details being shown in the main presentation), 1,806.

It will be noticed that 41 prisoners, 262 convicts, 876 homeless minors, and 8,563 paupers were also subject to defective physical conditions; that is, in the aggregate, 9,742 persons of the socially defective classes were also physically defective. The character of the physical defects to which these 9,742 persons were subjected may be seen in the following summary, in which the figures are brought forward from the main presentation:

Persons Physically Defective among those Socially Defective.

Classification.	Prisoners	Convicts	Homeless Minors	Paupers	Total Persons Socially Defective and also Physically Defective
Acute diseases only,	1	19	21	96	137
Chronic diseases only,	15	65	44	964	1,088
Maimed only,	10	50	6	88	154
Lame only,	2	33	35	347	417
Bedridden only,	–	–	1	31	32
Paralytic only,	2	8	9	215	234
Epileptic only,	1	3	18	96	118
Insane only,	4	6	53	5,154	5,217
Idiotic only,	–	1	293	464	758
Deaf only,	2	29	26	78	135
Dumb only,	–	–	–	2	2
Deaf and dumb only,	–	2	114	19	135
Blind only,	–	22	189	251	462
Other defective physical conditions only,	1	18	23	80	122
Physical defects specified, in various combinations,	3	6	44	678	731
Totals,	41	262	876	8,563	9,742

The totals in the foregoing table show that of the socially defective persons who were also physically defective, the number having acute diseases only was 137; chronic diseases only, 1,088; maimed only, 154; lame only, 417; bedridden only, 32; paralytic only, 234; epileptic only, 118; insane only, 5,217; idiotic only, 758; deaf only, 135; dumb only, 2; deaf and dumb only, 135; blind only, 462; other defective physical conditions only, 122; afflicted with the physical defects specified, in various combinations, that is, having more than one of the physical defects named (the details being shown in the main presentation), 731.

As there were 41,861 persons having defective physical conditions, but not socially defective, or in other words, not included in the four specified classes of social defectives, it follows that in the aggregate there were 51,603 persons who were subjected to some kind of physical defect. On the other hand, if we deduct the persons socially defective and also physically defective, numbering, as we have said, 9,742, from the total number of persons classed as socially defective, namely, 23,898, we find that there were 14,156 persons belonging to the socially defective classes who were able-bodied, that is, not physically defective.

No other analysis of the table is required until the second presentation relating to the subject is considered. This presentation follows, and to it attention is directed, as it has an important bearing upon the statistics contained in the previous tables.

Defective Social and Physical Condition.

On the Basis of Conditions.

For the State.

PRISONERS.

ON THE BASIS OF CONDITIONS.

For the State.

PRISONERS.

The number of persons included in this presentation is shown in the following tabular statement:

Prisoners (able-bodied)	1,337
Prisoners (acute diseases)	1
Prisoners (chronic diseases)	15
Prisoners (maimed)	10
Prisoners (lame)	2
Prisoners (paralytic)	2
Prisoners (epileptic)	1
Prisoners (insane)	4
Prisoners (deaf)	2
Prisoners (other defective physical conditions)	1
Prisoners (chronic diseases — lame)	1
Prisoners (chronic diseases — other defective physical conditions)	1
Prisoners (lame — deaf)	1
TOTAL PRISONERS	1,378

The presentations in this part of the volume represent *conditions* instead of persons, but in the case of prisoners, convicts, homeless minors, and paupers the figures for persons and conditions are the same. In the sections which will follow the four just named, it is evident that duplications must occur as regards persons. If a person has two defective conditions, it is evident that he must appear in two sections and must therefore be counted twice. If he has three defective conditions, he appears in three sections and is therefore counted three times. It is owing to these duplications that the presentations are made on the basis of *conditions*.

The first presentation under this section shows for the State the occupations, sex, place of birth, and descent of the prisoners, classified so as to show the following details: Age periods, length of residence in the United States, political condition, illiteracy, and percentages of time employed and unemployed.

It will be seen that the native born prisoners have been classified according to sex in three subdivisions — native born (native descent), including the native born prisoners having fathers native born; native born (foreign descent), including the native born prisoners having fathers foreign born; and native born (descent unknown), including the native born prisoners whose fathers' birthplace could not be ascertained.

The foreign born males have been considered in three distinct classes; foreign born (naturalized), including those males of foreign birth, 21 years of age or over, who have complied with the naturalization laws of the United States; foreign born (alien), including those foreign born males 21 years of age and over who have not complied with the constitutional requirements; and foreign born, including those of foreign birth neither naturalized nor alien.

Under each subheading of native and foreign born the class of occupation in which the prisoner was engaged prior to his incarceration is given; also subdivisions of these classes and specifications of particular branches of employment where there is sufficient number to warrant stating same.

Under the specifications as to occupations is shown the place of birth, except in the subdivision native born (foreign descent). Under this division the place of birth of the father is considered.

A few illustrations of the proper manner of reading this table will be found of value. On pages 390 and 391, under males, native born (native descent), we note there are 25 prisoners comprehended under the class of occupation designated as "trade." Of these, we find 12 born in Massachusetts and 13 in other States. Considering the total line, it will be seen that of the 25 engaged in trade, one was 15 but under 20 years of age; 23, 20 but under 60 years of age; and one was 60 years of age or over; nine were found to be residents of the United States six years but under 30 years, 15 were residents of the United States 30 years and over, while for one prisoner the length of residence was unknown; 14 were voters and nine were non-voters; they were

all literate; the 25, taken as a whole, were employed at their regular occupation 71 per cent of the Census year, at some occupation other than their regular one nine per cent of the year, were unemployed eight per cent of the year, and for 12 per cent of the time the question as to employment and unemployment was inapplicable to them.

Again, on pages 392 and 393, under native born (foreign descent), we find 213 males engaged in manufactures. The industry "boots and shoes" under this class of occupation includes 44, and is subdivided into the branch "shoemakers, *n. s.*," which includes 10, and into "other boot and shoe workers," including 34. Under the latter we note the descent of the prisoners, 28 being of Irish descent (fathers born in Ireland), and six of other foreign descent (fathers born in some other foreign countries). The facts for each line in this class may be traced in the same manner as was previously cited for trade.

In the recapitulation which follows this table the salient lines are brought forward and aggregated for sex, and native born and foreign born.

For an explanation of some of the terms used in the occupation showing, such as "regular," "other," etc., we refer the reader to the analysis of this section, page 426, *post*.

The second presentation under this section gives the exact ages of the prisoners, males and females, by color and race, and conjugal condition. The proper manner of reading this table is obvious. Take, for instance, on page 397, the male prisoners 33 years of age; we find the total number of males of this age to be 43, of whom 40 were white and three colored; 20 were single, 20 were married, one was widowed, one was divorced, and for one prisoner of this age the conjugal condition could not be obtained. The recapitulation following shows the facts regarding color and race and conjugal condition by age periods.

The final table in this section presents the place of birth of the prisoners in detail by States and countries under native born and foreign born, classified by age periods and sex. To illustrate the use of the table we refer to page 400, under the foreign born place of birth, Ireland. We find one male and one female prisoner 10 to 19 years of age, making a total of two for that age period; 294 males and 67 females were 20 years of age and over, making a total of 361 for that period; while for all ages we find 295 males and 68 females, making a total of 363 prisoners born in Ireland.

It will be noted that blank columns have been kept in some of the tables in this section. These were retained in order to avoid a change in the typographical arrangement of the page.

Information regarding parent nativity may be found on pages 428 and 429, *post*, of the analysi .

For the alleged offences of the prisoners in detail, the reader is referred to the analysis, pages 429 and 430, and to page 430, for a classification of such offences.

CONVICTS.

ON THE BASIS OF CONDITIONS.

For the State.

CONVICTS.

The number of persons comprehended under this section is shown in the following tabular statement:

Convicts (able-bodied)	5,780
Convicts (acute diseases)	19
Convicts (chronic diseases)	65
Convicts (maimed)	50
Convicts (lame)	33
Convicts (paralytic)	8
Convicts (epileptic)	3
Convicts (insane)	6
Convicts (idiotic)	1
Convicts (deaf)	29
Convicts (deaf and dumb)	2
Convicts (blind)	22
Convicts (other defective physical conditions)	18
Convicts (acute diseases — chronic diseases)	1
Convicts (acute diseases — maimed)	1
Convicts (acute diseases — lame)	1
Convicts (acute diseases — other defective physical conditions)	1
Convicts (chronic diseases — paralytic)	1
Convicts (chronic diseases — deaf)	1
Total Convicts	6,042

As was stated in the prisoner section, the presentations in this part of the volume represent *conditions* instead of persons; but in the case of prisoners, convicts, homeless minors, and paupers the figures for persons and conditions are the same. In consideration of the results shown in the sections which will follow the four above mentioned, it must be borne in mind that duplications must occur as regards persons. For instance, if a person has two defective conditions, it is evident that he must appear in two sections, and must therefore be counted twice. If he has three defective conditions, he appears in three sections, and is counted three times. It is owing to these duplications that the presentations are made on the basis of *conditions*.

The first presentation under this section shows the occupations, sex, place of birth, and descent of the convicts, classified so as to show age periods, length of residence in the United States, degree of illiteracy, and percentages of time employed and unemployed.

It will be seen that the native born convicts have been considered in three classes: Native born (native descent), including those native born convicts having fathers also native born; native born (foreign descent), including native born convicts having fathers foreign born; and native born (descent unknown), including the native born convicts whose fathers' birthplace was unknown.

The convicts of foreign birth have been considered as a whole under the heading "Foreign Born." The omission of the subdivisions under foreign born into naturalized, alien, etc., is due to the fact that convicts have no political condition.

Under each nativity subheading the class of occupation in which the convict was engaged prior to his incarceration is given, together with the details as to the special branch of industry under specified class, where a sufficient number so engaged warrants stating same. Under these occupation specifications the place of birth of the convict is given, except under the heading "Native Born (Foreign Descent)," and here it will be understood, the place of birth of the father is considered, such being stated as descent.

To insure a proper reading of the table, we quote from pages 404 and 405, under males, the native born (native descent) class, and under the occupation class designated as "Government." We find that six convicts were engaged in government service prior to their commitment; of these, three were born in Massachusetts and three

in other States. Considering the Massachusetts line, we note that all were 20 but under 60 years of age; one had resided in the United States six years but under 30 years, while two had resided in the United States 30 years and over; the whole three were literate; they had been engaged at their regular occupation 19 per cent of the Census year, at some occupation other than their usual one three per cent of the time; for 11 per cent of the Census year they were unemployed, while for 67 per cent of the time covered the inquiry as to employment and unemployment was inapplicable. For an explanation of the term "inquiry inapplicable," as well as that for "regular occupations," "other occupations," etc., we refer the reader to page 426 of the analysis of prisoners.

It will be noted that the two columns of voters and non voters under political condition are blank throughout, convicts being debarred from the right of suffrage, as was previously stated. These columns are retained in order to avoid a change in the typographical arrangement of the page.

In the recapitulation which follows, the salient lines of the table are brought forward and aggregated.

In the second presentation the exact ages of the convicts are given, by males and females, classified by color and race, and conjugal condition. The proper manner of reading this table is obvious. On page 420, we note that the number of male convicts 30 years of age was 189, of whom 180 were white, eight were colored, and one was an Indian; 132 were single, 51 were married, three were widowed, and three were divorced.

The recapitulation of this table shows an aggregation by age periods. The blank columns are retained in this table in order to avoid hereinafter a change in the typographical arrangement.

The third and final presentation in this section shows the place of birth of the convicts in detail by States and countries, under native born and foreign born, classified by sex and age periods. To illustrate the proper reading of the table we refer to page 424, birthplace Massachusetts. We note that there were 375 males and 37 females 10 to 19 years of age, making a total of 412 for the age period; of those 20 years of age and over we find 2,028 males and 247 females, making a total of 2,275; of convicts of all ages born in Massachusetts, we note 2,403 were males and 284 were females, totalizing 2,687.

For the place of birth and parent nativity of the convicts the reader is referred to the analysis of this section, pages 432–434, *post*.

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Pages
PRISONERS,	387–400
CONVICTS,	401–424

PRISONERS.

The first presentation relates to prisoners. The reader will bear in mind what has been said on page 380 relative to the persons included under the term "prisoner." The explanatory notes contained upon pages 388 and 389 should be read in connection with the tables. The tabular statement on page 388 shows the composition of the prisoners as to their physical condition, from which it will be seen that practically all these persons were able-bodied, the aggregate number of able-bodied being 1,337 out of the total 1,378. Those who are reported as having defective physical condition are distributed among various forms of physical debility, as shown by the table.

Occupations, Sex, Nativities and Descent, Political Condition, and Place of Birth: By Age Periods, Length of Residence, Voters and Non Voters, Illiteracy, and Employment and Unemployment.

The table beginning on pages 390 and 391 shows the classified occupations of the prisoners, both males and females, by age periods, also the length of residence in the United States, whether the person was a voter or non voter, the degree of illiteracy of the person, and the percentages of time employed and unemployed. The prisoners are classified so as to show whether the person was native born, of native descent; native born, of foreign descent (that is to say, of foreign parentage); native born, descent unknown; foreign born, naturalized; foreign born, alien (that is, foreign born 21 years of age or over, not naturalized); and foreign born, including those persons neither naturalized nor alien. Under each of these general specifications as to nativity and parentage, details are presented relating to the occupations, ages, length of residence in the United States, etc., as before stated.

In classifying the prisoners as regards occupations, the occupation of the person before imprisonment has been taken. Where this occupation was not ascertainable, the person has been included under the class Not Stated (Unknown), and the questions as to employment and unemployment considered inapplicable. The figures showing percentages of time during which the prisoners were employed and unemployed relate only to the facts during the Census year prior to the imprisonment of the person, and are subject to other qualifying statements hereinafter fully set forth. These explanations should be constantly borne in mind in connection with the figures.

The recapitulation of the first table, which will be found on pages 396 and 397, shows that of the entire number of prisoners, aggregating 1,378 persons, 748 were native born, including 255 persons of native descent, 485 of foreign descent, and eight whose descent, whether native or foreign, was unknown. The foreign born prisoners number 630, including 225 naturalized persons, 270 alien, and 135 who were foreign born, not included in the naturalized or alien classes. It is therefore seen that of the total number of prisoners, namely, 1,378, only 255 were native born, of native descent; the others, aggregating 1,123, or 81.49 per cent of the whole number, were either foreign born, or of foreign descent, except eight for whom the facts as to descent were unknown. The

aliens, including under that head only persons who were foreign born and of such an age that age only being considered they might become naturalized, numbered but about 20 in every 100 of the total number of prisoners (19.59 per cent). Of such persons 18 had resided in the United States one year or less and were therefore debarred from naturalization on account of residence; 43 others had resided in the United States over one year but under six years; while 171 had resided in the United States six years but under 30 years, and 22 had resided in the United States 30 years and over. By far the larger number of aliens could therefore have become naturalized had they so desired. Of the entire number of foreign born, namely, 630, there were 372 who had resided in the United States six years but under 30 years, and 136 had resided in the United States 30 years and over. The facts under each of these heads are clearly shown in the table with respect to males and females separately, but as the females are in a comparatively small minority, it is not necessary to enter upon the question of sex in this analysis.

Nearly all the prisoners, that is, 1,266 out of 1,378, are found within the age period 20 but under 60, and are therefore within what is called the productive age. Only 33 were 60 years of age and over, and but 79 were under 20 years of age. It will not be forgotten, of course, that the term "prisoner" does not include a large number of juvenile offenders, who, as explained on page 380, are mainly included under the term "homeless minors," to be hereinafter considered.

With respect to political condition, the prisoners included 478 voters and 611 non voters. As to illiteracy, 21 could not write, and 104 could neither read nor write, the total number of illiterates included in both these classes being 125.

The percentages of time during which the prisoners were employed or unemployed within the Census year prior to their imprisonment are detailed under five heads, namely, "regular occupations," "other occupations," "unemployed," "inquiry inapplicable," and "not given." Thus the full 12 months of the Census year are accounted for under one or more of these heads. The term "regular occupations" applies to the time during which the person was employed in his usual occupation. The term "other occupations" applies to the time the person was employed in occupations other than his usual one. The term "unemployed" applies to the time the person was not employed at any occupation, that is, was entirely unemployed or subjected to enforced idleness from lack of work. If the person had work, but circumstances such as sickness, incarceration, etc., prevented him from attending to it, the time thus covered is included under the head "inquiry inapplicable;" that is to say, the questions as to employment and unemployment have been considered inapplicable during this time. The term "inquiry inapplicable" is also used in a broader sense. It applies to the time during which a person had work, but through force of circumstances, as previously stated, was unable to perform his work, and it also applies to the time during which a person was engaged in an occupation which was not gainful, or in an occupation which although remunerative and gainful, was not from its nature confined within definite or restricted hours of service. For example, the classes Scholars, Students, etc., although used as definite occupation designations in the Census, do not comprise persons in gainful occupations; and some persons in government and professional service receive compensation for their service, but their time of employment is indefinite and varied. It is also understood that the questions as to employment and unemployment must be inapplicable to persons belonging to the classes termed Retired, Dependent, and At Home, and for whom the facts as to occupation are given in the class Not Stated (Unknown). The term "not given" applies to the time for which the information regarding employment and unemployment could not be obtained.

Bearing in mind this explanation, it will be seen from the recapitulation, pages 396 and 397, that, referring to the aggregate line for the prisoners, 1,378 were employed in their regular occupations 50 per cent of the time during the Census year, and in occupations other than their regular ones, five per cent of the time; they were unemployed eight per cent of the time; and, finally, during 37 per cent of the Census year they were subjected to conditions which rendered the inquiry as to employment and unemployment inapplicable. This last percentage may seem very large for so small a number of per-

sons, but it should be borne in mind that in view of the general conditions which have been previously explained, under which the questions would be inapplicable, they must have been inapplicable in a considerable number of cases on account of the fact that the prisoners were incarcerated for a longer or shorter period during the year.

Reference to the main presentation will show the distribution of males and females through the different divisions of industry. We need only point out here the aggregates, without respect to nationality or other qualifying facts. These are contained in the following analysis table:

Classes of Occupations.	Persons	Age Periods				Length of Residence in the United States					Political Condition		Illiteracy			
		Under 15	15 but under 20	20 but under 60	60 and Over	1 Year or Less	Over 1 Year but under 6 Years	6 Years but under 30 Years	30 Years and Over	Unknown	Voters	Non Voters	Cannot Read	Cannot Write	Neither Read nor Write	Total Number of Illiterates

Not stated (unknown),	67	–	6	57	4	2	1	16	26	22	8	39	–	–	7	7

In government service there were found 25 prisoners; under the head of professional, nine; classified under domestic service, 150; personal service, 37; trade, 54; transportation, 138; agriculture, 23; in the fisheries, two; manufactures, 544; in mining, which in Massachusetts consists mainly of persons engaged in quarrying, who were included under the head of mining in the Census, eight; laborers, comprising persons unskilled, 296; two classified as children at work; three as scholars; one, not gainful, etc.; one, not productive; 16 who were unemployed twelve months during the Census year; two classed as dependents; and 67 for whom the facts as to occupation were not stated. These occupation designations conform to the Census classification of occupations.

The most salient lines are those showing persons employed in manufactures, the laborers, persons classed under the head of domestic service, and persons engaged in transportation, these together comprising 1,128 prisoners, or 81.86 per cent of the total number.

Ages: By Color and Race and Conjugal Condition.

The presentation beginning on page 396 shows the exact ages of the prisoners, with facts as to color and race, and conjugal condition, and this is followed with a recapitula-

tion by age periods, presented on page 399. From this recapitulation, referring only to aggregates, we note that the total being 1,378, the white persons numbered 1,347; and as to conjugal condition, there were 825 single, 440 married, 103 widowed, four divorced, and the facts as to the conjugal condition of six were unknown. The term "widowed" in this connection, as in other parts of the Census, includes persons of either sex deprived by death of husband or wife, and not remarried. In the age period 10 to 14 years are found two prisoners, the number in the other age periods being as follows: 15 to 19 years, 77; 20 to 29 years, 461; 30 to 39 years, 449; 40 to 49 years, 236; 50 to 59 years, 120; and 60 to 79 years, 33.

Place of Birth and Parent Nativity of the Prisoners.

We insert the following analysis table, showing the place of birth and parent nativity of the prisoners:

Place of Birth.	Prisoners Born in Specified States or Countries	Prisoners Having Fathers Born in Specified States or Countries			Prisoners Having Mothers Born in Specified States or Countries			Prisoners Having Both Parents Born in Specified States or Countries	Prisoners Having One Parent Only Born in Specified States or Countries	Prisoners Having One or Both Parents Born in Specified States or Countries

This table requires no special analysis, but the facts in it will enable the reader to trace the exact influence of different nationalities on the prison population. The general fact of nativity, as to whether native, foreign, or of native or foreign descent, has been previously shown, but the details contained in this table are necessary in order to bring out the influence of particular nationalities upon the aggregate number of prisoners of foreign descent.

The method of reading the table is, of course, obvious. Of the 748 prisoners who were native born, 504 were born in Massachusetts. But while this is the fact, there were but 96 who had fathers born in Massachusetts; and 97 who had mothers born in Massachusetts; 63 had both parents born in Massachusetts; 66 had one parent only born in Massachusetts; while but 129 had either one or both parents born in Massachusetts. This last figure shows the complete influence of Massachusetts upon the prison population, so far as this influence is determined by parent nativity including either one or both parents. In the same way, it will be seen from the table that while there were 128 prisoners who were themselves born in New England States other than Massachusetts, there were but 115 who had but one or both parents born in such States. On the other hand, with respect to the foreign born prisoners, while the aggregate number was but 630, there were 1,109 who had foreign born fathers and 1,103 who had foreign born mothers.

Subdividing the foreign born so as to bring out the nationalities which are most numerous, it will be seen that there were 363 prisoners who were born in Ireland. There were 817 who had fathers born in Ireland, and the same number who had mothers born in Ireland; 783 who had both parents born in Ireland; 68 having one parent only born in Ireland; and, finally, 851 who had one or both parents born in Ireland. Referring to the aggregates only and taking the other most numerous classes among the foreign born prisoners, we find that there were 81 who had one or both parents born in England; 61 who had one or both parents born in Canada, of French extraction; 41 who had one or both parents born in Canada, of English extraction; and 49, one or both parents born in Scotland. In the same manner the influence of any other nationality can be traced.

The table on page 400 shows the place of birth of the prisoners in detail, and from this it is at once seen that of the native born, who aggregate 748, the number born in Massachusetts was 504, there being 206 born in the town named in Massachusetts, that is, the city or town in which they were found in prison, and 298 in other towns.

Offences.

We close the analysis relating to prisoners with two tables which follow, the first showing the nature of the offences for which the persons were incarcerated:

Nature of Alleged Offences.	Males					Females					Both Sexes				
	Awaiting Trial	Serving Out a Fine	Held as a Witness	Not Stated	Total	Awaiting Trial	Serving Out a Fine	Held as a Witness	Not Stated	Total	Awaiting Trial	Serving Out a Fine	Held as a Witness	Not Stated	Total
Adultery,	14	–	–	–	14	16	1	–	–	17	30	1	–	–	31
Assault,	11	13	–	–	24	1	1	–	–	2	12	14	–	–	26
Assault and battery,	10	28	–	–	38	1	–	–	–	1	11	28	–	–	39
Breaking and entering,	52	2	–	–	54	–	–	–	–	–	52	2	–	–	54
Disturbing the peace,	1	18	–	–	19	–	3	–	–	3	1	21	–	–	22
Drunkenness,	51	663	–	–	714	8	100	–	–	108	59	763	–	–	822
Fornication,	1	9	–	–	10	–	17	–	–	17	1	26	–	–	27
Larceny,	25	28	1	–	54	1	3	–	–	4	26	31	1	–	58
Liquor laws, violating	3	32	–	–	35	1	8	–	–	9	4	40	–	–	44
Military offences,	–	–	–	22	22	–	–	–	–	–	–	–	–	22	22
Robbery,	16	–	–	–	16	–	–	–	–	–	16	–	–	–	16
Walking on railroad track,	–	48	–	–	48	–	1	–	–	1	–	49	–	–	49
All other offences,	85	59	4	4	152	6	8	–	2	16	91	67	4	6	168
Totals,	269	900	5	26	1,200	34	142	–	2	178	303	1,042	5	28	1,378

Of the total number, 1,378, there were 303 awaiting trial, 1,042 were serving out a fine by imprisonment in lieu of payment, and five were held as witnesses. In 28 cases out of the total number the reason for the imprisonment was not stated; of these, 22 were military offences, and six, various other offences. Of the persons awaiting trial, 59 were incarcerated for drunkenness; 52 for breaking and entering; 30 for adultery; 26 for larceny; 12 for assault; 11 for assault and battery; and 16 for robbery. Of persons serving out a fine, 763, or 73.22 per cent of the entire number, were incarcerated for drunkenness. Of the total number of prisoners, 822, or 59.65 per cent, were incarcerated for this offence; the next largest number of persons incarcerated for any single offence was 58, imprisoned for larceny. The wide gap between drunkenness and other offences and the large proportion which drunkenness forms of the grand total are thus clearly shown.

We present a final table showing a condensed classification of offences for which the persons were imprisoned.

Classification of Offences.	Males					Females					Both Sexes				
	Awaiting Trial	Serving Out a Fine	Held as a Witness	Not Stated	Total	Awaiting Trial	Serving Out a Fine	Held as a Witness	Not Stated	Total	Awaiting Trial	Serving Out a Fine	Held as a Witness	Not Stated	Total
Against the person feloniously,	28	2	–	–	30	1	–	–	–	1	29	2	–	–	31
Against the person not feloniously,	34	53	–	–	87	2	2	–	–	4	36	55	–	–	91
Against property,	91	45	1	–	137	1	4	–	–	5	92	49	1	–	142
Forgery and offences against the currency,	12	3	–	–	15	–	–	–	–	–	12	3	–	–	15
Against public justice,	1	–	–	–	1	–	–	–	–	–	1	–	–	–	1
Against the public peace,	1	18	–	–	19	–	3	–	–	3	1	21	–	–	22
Against chastity, morality, decency, and good order,	95	692	–	23	810	29	124	–	–	153	124	816	–	23	963
Against the public policy,	3	33	–	–	36	1	8	–	–	9	4	41	–	–	45
Miscellaneous,	4	54	4	3	65	–	1	–	2	3	4	55	4	5	68
Totals,	269	900	5	26	1,200	34	142	–	2	178	303	1,042	5	28	1,378

By the foregoing table it will be seen that when condensed the classification of offences is as follows: Against the person feloniously, 31, of whom 29 were awaiting trial; against the person not feloniously, 91, of whom 36 were awaiting trial; against property, 142, of whom 92 were awaiting trial; forgery and offences against the currency, 15, of whom 12 were awaiting trial; against public justice, one; against the public peace, 22, one of whom was awaiting trial; against chastity, morality, decency, and good order (drunkenness being included in this classification), 963, of whom 124 were awaiting trial; against the public policy, 45, four of whom were awaiting trial; miscellaneous, 68, there being four prisoners awaiting trial.

Convicts.

The presentations relating to convicts follow the same order as that for prisoners. The definition of convict, as distinguished from prisoner, appears upon page 380.

The tabular statement on page 402 shows the composition of the convicts as to their physical condition, and from this it appears that the total number was 6,042, of whom

5,780 were able-bodied; the comparatively small minority which was reported as having defective physical condition being, as was the case among the prisoners, of various degrees of physical debility, as shown by the table.

Occupations, Sex, Nativities and Descent, and Place of Birth: By Age Periods, Length of Residence, Illiteracy, and Employment and Unemployment.

The table beginning on pages 404 and 405 classifies the convicts with regard to their occupations, by sex and age periods, and by length of residence in the United States, and also shows the degree of illiteracy of the convicts, and the percentages of time employed and unemployed. The presentation also shows whether the convict was native born, of native descent; native born, of foreign descent (namely, of foreign parentage); native born, descent unknown; or foreign born. The details relating to occupations, ages, length of residence in the United States, illiteracy, and percentages of time employed and unemployed are given under each of these general specifications as to nativity and parentage. As the convicts are very much more numerous than the prisoners, the deficiency of information regarding them, noted in the various presentations by the entry "unknown," is correspondingly larger than among the prisoners. As with the prisoners, in classifying the occupations, only the occupation followed by the convict before commitment has been entered. In 832 instances the outside employment could not be ascertained, and the entry as to occupation in such cases is necessarily given in the class Not Stated (Unknown).

It will be noticed that under the classification of nativity with respect to the foreign born, there is no subdivision of the foreign born convicts into naturalized, alien, or other foreign born. This is due to the fact that such details were not contained upon the returns, the convicts having no political condition.

We may also remind the reader that, as in the case of the prisoners, the returns showing percentages of time employed and unemployed relate only to the facts during the Census year prior to the incarceration of the convict, and only to cases wherein the inquiry was applicable as explained, with reference to the prisoners, on page 426, *ante*.

The recapitulation of the first presentation will be found on pages 420 and 421. This shows that of the entire number of convicts, namely, 6,042, there were 3,783 who were native born and 2,259 foreign born. The native born of native descent comprised 1,352, the native born of foreign descent, 2,251, and there were 180 convicts native born for whom the facts as to descent were unknown. Out of the whole number, therefore, there were 4,510, or 74.64 per cent, who were either foreign born or of foreign descent. Of the entire number of foreign born, there were 29 who had been in the United States one year or less; 244 had resided in the United States over one year but under six years; 1,470, six years but under 30 years; 393, 30 years and over, and for 123 the length of residence in the United States was unknown. Of the total number of convicts, 5,224 were 20 years of age but under 60, these comprising 86.46 per cent of the whole number; there were 16 convicts who were under 15; 646 who were 15 but under 20; and 156 who were 60 years of age and over. With regard to illiteracy, 167 could not write, and 540 could neither read nor write, making the total number of illiterates 707, or 11.70 per cent of the whole number. The female convicts numbered 843, or 13.95 per cent of the whole number of convicts; of these, 715, or 84.82 per cent of the whole number of female convicts, were either foreign born or of foreign descent; 38 could not write, and 168 could neither read nor write.

With respect to employment and unemployment, the questions were inapplicable to the convicts under conditions obtaining during 71 per cent of the time within the Census year; unemployment is reported as covering two per cent of the time; employment in the regular, that is, the usual occupation of the person, covering 26 per cent of the time; and employment in other occupations covering one per cent of the time.

The distribution of the sexes through the different divisions of industry are shown in the main presentation. The aggregates in each of the different classes of occupation are contained in the following analysis table:

Classes of Occupations.	Persons	Age Periods				Length of Residence in the United States					Illiteracy			
		Under 15	15 but under 20	20 but under 60	60 and Over	1 Year or Less	Over 1 Year but under 6 Years	6 Years but under 30 Years	30 Years and Over	Unknown	Cannot Read	Cannot Write	Neither Read nor Write	Total Number of Illiterates

It will be understood of course, that, as previously stated, these designations as to occupations apply to the occupation of the convict before commitment. In 832 instances this fact was not stated; of the others, covering in the aggregate 5,210 convicts, 23 were found in government service; 54 classified as professional; 754 in domestic service; 210, personal service; 307, trade; 539, transportation; 76, agriculture; 20 in the fisheries; 2,016, manufactures; 12, mining; 1,124, laborers, comprising persons unskilled; 18, apprentices; 41, scholars; four, retired; and 12, not gainful, etc. The larger numbers include those found in manufactures, who comprise 38.69 per cent of the total number for which occupations were reported; laborers, 21.57 per cent; domestic service, 14.47 per cent; transportation, 10.35 per cent; trade, 5.89 per cent; and personal service, 4.03 per cent.

The total number of illiterate convicts was 707; of these, 161, or 22.77 per cent, were found in domestic service; 128, or 18.10 per cent, in manufactures; and 185, or 26.17 per cent, were laborers.

Ages: By Color and Race and Conjugal Condition.

The presentation beginning on page 420 shows the exact ages of the convicts, and the facts as to color and race, and conjugal condition, followed by a recapitulation by age periods, presented on page 423.

The aggregates given in this recapitulation show that the total being 6,042, white convicts numbered 5,838; those reported as single, 3,867; married, 1,753; widowed, 391; divorced, 29; while the facts as to the conjugal condition of two were unknown. Of the whole number, 16 were found in the age period 10 to 14; 646, 15 to 19; 2,309, 20 to 29; 1,576, 30 to 39; 915, 40 to 49; 424, 50 to 59; 153, 60 to 79; two were 80 years of age and over; and the facts as to one convict were unknown.

Place of Birth and Parent Nativity of the Convicts.

The following analysis table shows the place of birth and parent nativity of the convicts:

Place of Birth.	Convicts Born in Specified States or Countries	Convicts Having Fathers Born in Specified States or Countries			Convicts Having Mothers Born in Specified States or Countries			Convicts Having Both Parents Born in Specified States or Countries	Convicts Having One Parent Only Born in Specified States or Countries	Convicts Having One or Both Parents Born in Specified States or Countries

This table is similar to the one presented relative to the prisoners. Referring to the native born, it will be seen that while 2,687 convicts were born in Massachusetts, there were but 612 who had fathers born in Massachusetts, 625 who had mothers born in Massachusetts, 417 who had both parents born in Massachusetts, 403 who had one parent only born in Massachusetts, and, finally, only 820 who had one or both parents born in Massachusetts. With regard to the convicts as a whole, while there were but 2,259 who were foreign born, there were 4,460 who had foreign fathers and 4,463 who had foreign mothers.

The most numerous classes, with respect to foreign place of birth and parent nativity, are the following: Born in Ireland, 1,126; having fathers born in Ireland, 3,007; having mothers born in Ireland, 3,052; having both parents born in Ireland, 2,825; having one parent only born in Ireland, 409; having one or both parents born in Ireland, 3,234; born in England, 301; having fathers born in England, 374; having mothers born in England, 321; having both parents born in England, 242; having one parent only born in England, 211; having one or both parents born in England, 453; born in Canada, of French extraction, 132; having Canadian French fathers, 214; having Canadian French mothers, 203; having both parents Canadian French, 183; having one parent only Canadian French, 51; having one or both parents Canadian French, 234; born in Canada, of English extraction, 179; having Canadian English fathers, 163; having Canadian English mothers, 188; having both parents Canadian English, 128; having one parent only Canadian English, 95; having one or both parents Canadian English, 223.

Summarizing as to aggregates only for some of the other foreign countries, we find the number of convicts having one or both parents born in such countries to be as follows: Scotland, 181; Nova Scotia, 119; Germany, 113; Italy, 78; New Brunswick, 67; France, 44; Newfoundland, 26; Prince Edward Island, 19; Wales, nine; and other foreign countries, 202.

The presentation showing the place of birth of convicts in detail is given on page 424. It will be seen that of the 3,783 native born convicts, 2,687, or 71.03 per cent of the total native born, were born in Massachusetts. Of these, 852 were born in the city or town in which they were enumerated, and 1,835 in other cities and towns.

Offences

We insert an analysis table showing the nature of the offences for which the convicts were incarcerated. The information contained in this table is by sex.

Nature of Offences.	Males	Females	Both Sexes
Adultery,	41	27	68
Assault,	118	3	121
Assault and drunkenness,	31	3	34
Assault to murder,	30	1	31
Assault to ravish,	31	–	31
Assault and battery,	115	11	126
Breaking and entering,	572	4	576
Breaking and entering and larceny,	124	–	124
Drunkenness,	1,879	537	2,416
Embezzlement,	47	–	47
Forgery,	38	–	38
Idle and disorderly,	81	43	124
Larceny,	840	47	887
Liquor laws, violating	35	14	49
Manslaughter,	45	2	47
Murder,	47	2	49
Night-walking,	–	32	32
Rape,	35	–	35
Receiving stolen goods,	44	1	45
Robbery,	137	–	137
Vagrancy,	265	11	276
All other offences,	644	105	749
Totals,	5,199	843	6,042

From the figures in this table we note that, of the whole number, 2,416 were committed for drunkenness; 887 for larceny; 576 for breaking and entering; 276 for vagrancy; 137 for robbery; 126 for assault and battery; 124 for breaking and entering and larceny, and the same number for being idle and disorderly; 121 for assault; and 749 for various other offences. These include all the offences for which more than 100 persons were imprisoned. The persons who were incarcerated for drunkenness form 39.99 per cent of the whole number; persons convicted of larceny, 14.68 per cent; and those confined for breaking and entering, 9.53 per cent.

The final table, which follows, shows a classification of the offences for which the convicts were committed:

Classification of Offences.	Males	Females	Both Sexes
Against the person feloniously,	387	8	395
Against the person not feloniously,	250	15	265
Against property,	1,722	56	1,778
Forgery and offences against the currency,	158	3	161
Against public justice,	4	2	6
Against the public peace,	29	7	36
Against chastity, morality, decency, and good order,	2,607	737	3,344
Against the public policy,	37	14	51
Miscellaneous,	5	1	6
Totals,	5,199	843	6,042

Of the whole number, 395 were convicted for offences against the person feloniously; 265, against the person not feloniously; 1,778 for offences against property; 161 for forgery and offences against the currency; six for offences against public justice; 36 for offences against the public peace; 3,344 for offences against chastity, morality, decency, and good order (including drunkenness); 51 for offences against the public policy; and six for miscellaneous offences not previously classified. These figures will show how large a proportion of the convictions for crime in Massachusetts is due to what may be called the minor offences, which in many States are not deemed offences at all. This, as has been many times pointed out, puts the Commonwealth at a disadvantage when the statistics of its criminal population, so-called, are compared with those of other States having a less stringent criminal code, or in which, possibly, a less stringent administration of the law may be found.

Homeless Minors.

ON THE BASIS OF CONDITIONS.

For the State.

HOMELESS MINORS.

The number of persons considered in this section is shown in the following tabular statement:

Homeless minors (able-bodied)	4,548
Homeless minors (acute diseases)	21
Homeless minors (chronic diseases)	44
Homeless minors (maimed)	6
Homeless minors (lame)	35
Homeless minors (bedridden)	1
Homeless minors (paralytic)	9
Homeless minors (epileptic)	18
Homeless minors (insane)	53
Homeless minors (idiotic)	293
Homeless minors (deaf)	26
Homeless minors (deaf and dumb)	114
Homeless minors (blind)	189
Homeless minors (other defective physical conditions)	23
Homeless minors (chronic diseases — lame)	1
Homeless minors (chronic diseases — paralytic)	1
Homeless minors (chronic diseases — idiotic)	1
Homeless minors (chronic diseases — blind)	1
Homeless minors (lame — paralytic)	1
Homeless minors (lame — epileptic)	1
Homeless minors (lame — idiotic)	2
Homeless minors (paralytic — idiotic)	3
Homeless minors (epileptic — insane)	8
Homeless minors (epileptic — idiotic)	17
Homeless minors (insane — deaf and dumb)	2
Homeless minors (idiotic — deaf and dumb)	1
Homeless minors (idiotic — blind)	1
Homeless minors (deaf — blind)	2
Homeless minors (lame — paralytic — idiotic)	1
Homeless minors (paralytic — epileptic — idiotic)	1
TOTAL HOMELESS MINORS	5,424

As was stated in the explanatory notes of the two preceding sections, the presentations in this part of the volume represent *conditions* instead of persons; but in the case of prisoners, convicts, homeless minors, and paupers the figures for persons and conditions are the same.

In considering the totals of all the sections which will follow the four above mentioned, it must be borne in mind that duplications must occur as regards persons. For example, if a person has two defective conditions, it is evident that he must appear in two sections, and must therefore be counted twice. If he has three defective conditions, he appears in three sections, and is therefore counted three times. It is owing to these duplications that the presentations are made on the basis of *conditions*.

The first presentation under this section shows the occupations, sex, place of birth, and descent of the homeless minors, classified so as to show age periods, length of residence in the United States, and degree of illiteracy.

It will be seen that the native born homeless minors have been considered in three classes: Native born (native descent), including those native born homeless minors having fathers native born; native born (foreign descent), comprising those having fathers foreign born; and native born (descent unknown), including native born homeless minors whose fathers' birthplace could not be ascertained. There is no subdivision of foreign born.

Under each nativity subheading the class of occupation in which the homeless minor was engaged is given; also subdivisions of these classes, and specifications of particular branches of employment where there is sufficient number to warrant stating same. Under the occupation specifications the place of birth of the person is shown, except in the nativity class "Native Born (Foreign Descent);" in this division, the place of birth of the father is considered, expressed in descent.

An illustration of the proper manner of reading the table will be found of value. On page 441, under males, native born (native descent), we find eight homeless minors classified as laborers, seven of whom were born in Massachusetts and one in some other State. Considering the Massachusetts line, we note the whole seven were 15 but under 20 years of age, and all had resided in the United States six years but under 21 years; we also note that none of them were illiterate. Any line in the presentation may be analyzed in like manner.

In the recapitulation which follows this table the salient lines are brought forward and aggregated for sex, nativity, and descent.

The second presentation under this section gives the exact ages of the homeless minors, males and females separately, by color and race, and conjugal condition. The reading of this table is obvious. On page 446, we find 46 males who were 19 years of age; of these, 45 were white and one was colored; the whole 46 were single.

The recapitulation of this table shows an aggregation of facts by age periods.

For the place of birth of the homeless minors in detail by States and countries, we refer the reader to the analysis of this section, pages 467 and 468, *post*.

Information regarding parent nativity may also be found in the analysis, pages 466 and 467, *post*.

HOMELESS MINORS. FOR THE STATE.

OCCUPATIONS, SEX, NATIVITIES AND DESCENT, AND PLACE OF BIRTH: BY AGE PERIODS, LENGTH OF RESIDENCE, AND ILLITERACY.

Occupations, Sex, Place of Birth, and Descent.	Persons	Age Periods			Length of Residence in the United States				Illiteracy

PAUPERS.

ON THE BASIS OF CONDITIONS.

For the State.

PAUPERS.

The number of persons included in this presentation is shown in the following tabular statement:

Paupers (able-bodied)	2,491
Paupers (acute diseases)	96
Paupers (chronic diseases)	964
Paupers (maimed)	88
Paupers (lame)	347
Paupers (bedridden)	31
Paupers (paralytic)	215
Paupers (epileptic)	96
Paupers (insane)	5,154
Paupers (idiotic)	464
Paupers (deaf)	78
Paupers (dumb)	2
Paupers (deaf and dumb)	19
Paupers (blind)	251
Paupers (other defective physical conditions)	80
Paupers (acute diseases — chronic diseases)	2
Paupers (acute diseases — maimed)	1
Paupers (acute diseases — lame)	2
Paupers (acute diseases — insane)	1
Paupers (acute diseases — idiotic)	1
Paupers (acute diseases — deaf)	2
Paupers (acute diseases — deaf and dumb)	1
Paupers (chronic diseases — maimed)	5
Paupers (chronic diseases — lame)	20

Paupers (insane — deaf and dumb — blind)	1
Paupers (insane — blind — other defective physical conditions)	1
Paupers (deaf — blind — other defective physical conditions)	2
TOTAL PAUPERS	11,054

The presentations in this part of the volume represent *conditions* and not persons, but, as was stated in the previous sections, the figures for persons and conditions are the same for prisoners, convicts, homeless minors, and paupers.

In considering the totals of all the sections which will follow the four above named, it must be borne in mind that duplications will occur as regards persons. For instance, if a person has two defective conditions, it is evident that he must appear in two sections, and must therefore be counted twice. If he has three defective conditions, he appears in three sections, and is therefore counted three times. It is on account of these duplications that the presentations are made on the basis of *conditions*.

The first presentation under this section shows the occupations, sex, place of birth, and descent of the paupers, classified so as to show age periods, length of residence in the United States, and degree of illiteracy.

It will be noted that the native born paupers have been considered in three classes: Native born (native descent), including all native born paupers having fathers native born; native born (foreign descent), including all native born paupers having fathers foreign born; and native born (descent unknown), including those native born paupers whose fathers' birthplace could not be obtained. There is no subdivision of the foreign born paupers.

Under each nativity section, the class of occupation in which the pauper was engaged prior to his dependency or state of pauperism is given. Also subdivisions of these classes and details as to the particular branch of occupation are shown, where there is sufficient number to warrant stating same.

Under each occupation class or detail, the place of birth of the pauper is given, except under the subheading "Native Born (Foreign Descent);" here we have the birthplace of the father given, stated in descent.

To illustrate the proper manner of reading the table, we refer the reader to page 453. Under males, native born (native descent), we find there were 28 paupers engaged in personal service, 17 of whom were born in Massachusetts and 11 in other States. Tracing the Massachusetts line, we note that 12 were 21 but under 60 years of age, while five were 60 years of age and over; two had resided in the United States six years but under 30 years, 13, 30 years and over, while for two paupers the length of residence in the United States was unknown; we find two paupers who could neither read nor write, thus forming a total number of two illiterates. The various total and subdivision lines in this table may be read in like manner.

The recapitulation following this table brings forward the salient lines aggregated for sex, nativity, and descent.

The second presentation in this section gives the exact ages of the paupers, classified by males and females, so as to show color and race, and conjugal condition. The reading of this table is obvious. On page 460, we find 120 paupers who were 38 years of age; 119 were white and one was colored; there were 74 single, 38 married, five widowed, one divorced, and for two paupers of this age the conjugal condition could not be ascertained.

The recapitulation of this table shows an aggregation by age periods.

Information pertaining to place of birth in detail by States and countries can be found in the analysis, pages 474–476, *post*.

The reader is also referred to the analysis, pages 473 and 474, *post*, for parent nativity of the paupers.

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

Pages

HOMELESS MINORS, ... 437–448

PAUPERS, ... 449–463

HOMELESS MINORS.

The presentation relating to homeless minors will be found on pages 437–448. For the definition of the term the reader is referred to pages 380 and 381. Explanatory notes on pages 439 and 440 should be read in connection with the tables.

A statement showing the physical condition of these persons will be found on page 439. From this statement it will be seen that the total number being 5,424, there were 4,548 able-bodied; 293 were idiotic; 189, blind; 114, deaf and dumb; 53, insane; 44 were afflicted with chronic diseases; and 35 were lame. The others not reported as able-bodied were afflicted with various forms of physical debility, as shown in detail in the table.

Occupations, Sex, Nativities and Descent, and Place of Birth: By Age Periods, Length of Residence, and Illiteracy.

The distribution of the homeless minors under the occupation classification beginning on page 441 is identical with that which has been given for prisoners and convicts.

The following analysis table summarizes the facts as to classes of occupations:

CLASSES OF OCCUPATIONS.	PERSONS	AGE PERIODS			LENGTH OF RESIDENCE IN THE UNITED STATES				ILLITERACY			
		Under 15	15 but under 20	20 but under 21	1 Year or Less	Over 1 Year but under 6 Years	6 Years but under 21 Years	Unknown	Cannot Read	Cannot Write	Neither Read nor Write	Total Number of Illiterates

After what has been said elsewhere with respect to the general use of the term "occupation" in the Census, it will be understood that it is a distinction fixing status rather than actual employment in the sense in which that term is ordinarily used; and the persons included under the term "homeless minors," being largely children, are, of course, not actually engaged in employment, although they are included under some one of the classes contained within the occupation classification of the Census.

By referring to the preceding table, it will be seen that out of 5,424, the total number, 3,340, or 61.58 per cent, are given as scholars, which includes pupils of school age under instruction in public or private schools. Of the others, 1,625 were at home; 224 were classified as not stated (unknown), meaning that the designation fixing their status was not given so as to enable them to be classified under some one of the occupation designations. The others, numbering in the aggregate 235 persons, were distributed through the various occupation classes, most of which indicate that they were employed before becoming subjects of public charity, by which they were brought into the section "homeless minors." The table shows that 12 of these were employed in government service; 55 in domestic service; seven, personal service; nine, trade; seven, transportation; three, agriculture; 36, manufactures; 44, laborers; eight, apprentices; 51, children at work, meaning persons at work 14 years of age and under; while three were students.

The recapitulation on page 445 shows that of the total number of homeless minors, namely, 5,424, there were 4,914 native born, of whom 1,314 were of native descent, 1,703 of foreign descent, and 1,897 of unknown descent; on the other hand, 510 were foreign born. The persons foreign born, or of known foreign descent, aggregate 2,213, or 40.80 per cent of the total number. The number under 15 years of age was 4,461, or 82.25 per cent of the total number; while 907 were 15 years of age but under 20, and 56 were 20 but under 21, the age limit, it will be borne in mind, for persons of this class being 21. Of the entire number of homeless minors, 255 had been in the United States one year or less, and 830 over one year but under six years, the numbers in both cases being affected by the age of the person, and not implying that any considerable number had been brought into the United States having been born elsewhere; for it will be seen that of those who had been in the United States one year or less only 27 were of foreign birth, and of those who had been in the United States over one year but under six years, only 126 were of foreign birth.

The total number of illiterates among the homeless minors, including under that term those who could not write or who could neither read nor write, was 265, a very small proportion of the whole number.

The questions as to employment and unemployment, which have been presented in the corresponding table in the preceding sections relating to the defective classes have been omitted. As may be readily understood, the inquiry regarding employment and unemployment of the homeless minors was largely inapplicable, the percentage of time covered by the designation "inquiry inapplicable" being 98. It should be said with reference to the considerable number of persons concerning whom the information covered by the tables was reported as unknown, that this is due entirely to the limitations surrounding the persons who were included under the head of homeless minors. In many instances the place of birth of the person was unknown, as well as the facts as to parent nativity, and it was impossible to obtain exact information upon a number of other points in a considerable number of cases.

Ages: By Color and Race and Conjugal Condition.

The presentation beginning on page 445 shows the exact ages of the homeless minors, and the facts as to color and race, and conjugal condition, with a recapitulation by age periods. Referring to the recapitulation on pages 446 and 447, it will be seen that of the total number, 5,424, there were 5,260 white and 164 colored. None of the persons included in the presentation were married. There were 19 whose ages were unknown, and 56 appear in the table within the age period 20 to 21 years, but, as

previously stated, the age limitation upon these persons is 21. Of the others, 98 were under one year of age; 642 from one to four; 1,635 from five to nine; 2,067 from 10 to 14; and 907 from 15 to 19.

Place of Birth and Parent Nativity of the Homeless Minors.

We insert the following analysis table:

Place of Birth.	Homeless Minors Born in Specified States or Countries	Homeless Minors Having Fathers Born in Specified States or Countries			Homeless Minors Having Mothers Born in Specified States or Countries			Homeless Minors Having Both Parents Born in Specified States or Countries	Homeless Minors Having One Parent Only Born in Specified States or Countries	Homeless Minors Having One or Both Parents Born in Specified States or Countries

The figures in the preceding table show that while there were 4,914 homeless minors who were native born, there were only 1,325 who had fathers native born and 1,378 who had mothers native born. Similarly, while there were 3,972 homeless minors who were born in Massachusetts, there were only 837 who had fathers born in this State and 972 who had mothers born here, and in the aggregate, only 1,232 who had one or both parents born in Massachusetts. With respect to the other native born homeless minors, there were 377 who had one or both parents born in New England States other than Massachusetts, and 324 who had one or both parents born in States outside of New England. To summarize, although 4,914 homeless minors were of native birth, there were but 1,232 who had one or both parents born in Massachusetts, 377 who had one or both parents born in other New England States, and 324 who had one or both parents born in States outside of New England. On the other hand, while there were but 510 foreign born homeless minors, there were 2,127 who had fathers foreign

born and 2,240 who had mothers foreign born. Subdividing the homeless minors of foreign birth, and referring only to the fact of parent nativity as determined by one or both parents, that is to say, relying upon the figures shown in the first and final columns of the table, we note that while there were 237 born in British America, there were 848 who had one or both parents born in British America; while the number born in Canada, of French descent, was 114, there were 455 who had one or both parents of Canadian birth, French descent; although there were but 34 born in Germany, there were 141 who had one or both parents born in Germany; while the number born in Great Britain was but 89, there were 374 who had one or both parents born in Great Britain; while the natives of Ireland numbered but 59, there were 1,036 who had one or both parents of Irish birth. These are the most significant lines in the table. There were, however, 2,064 for whom the facts as to parent nativity were unknown.

The following table gives the place of birth of the homeless minors in detail by sex and age periods:

Foreign born,	64	47	111	239	145	384	4	11	15	307	203	510

We need only summarize the more important lines in the table. Of the total number of native born, 4,914, there were 2,283 under 10 years of age, 2,590 were within the age period 10 to 19, and 41 had passed the twentieth birthday, but being minors were of course not 21. Of the 3,972 native born homeless minors who were born in Massachusetts, 1,871 were under 10 years of age, 2,070 in the age period 10 to 19, while 31 had passed the twentieth birthday. There were 1,837 who were born in the town named, that is to say, in the town in which they were enumerated in the State, while 2,135 were born in other towns. Of the 510 foreign born homeless minors, 111 were under 10 years of age, 384 within the age period 10 to 19, and 15 had passed the twentieth birthday. Of the 114 Canadian French, 32 were under 10 years of age, 81 were within the age period 10 to 19, while one had passed the twentieth birthday. Of the 65 who were born in England, 19 were under 10 years of age, 45 within the age period 10 to 19. and one had passed the twentieth birthday. Of the 59 born in Ireland, four were under 10 years of age, 53 within the age period 10 to 19, and two had passed the twentieth birthday.

Residence and Means of Support of Homeless Minors.

The following analysis table shows the means of support of the homeless minors, classified by institutions and private families:

Residence and Means of Support.	Males	Females	Both Sexes
City and Town Almshouses.	173	158	331

* Other than almshouses.

Referring to the aggregates in the preceding table, 331 homeless minors will be found in city and town almshouses, of whom 324 were wholly supported by public charity, and seven partially thus supported. In city and State institutions (other than almshouses) there were 1,402 wholly supported by public charity. In private institutions there were 2,309, of whom 1,145 were wholly supported by public charity, 1,014 partially thus supported, 128 supported wholly by private charity, 10 supported by parents, six wholly self-supporting, while the facts as to six were not given. In private families we find 1,382 homeless minors, 867 of whom were supported wholly by public charity, 189 partially thus supported, 191 wholly by private charity, eight supported by parents, three supported by relatives, 35 wholly self-supporting, three partially self-supporting, the facts as to 86 not being given.

Aggregating these classes, we find 3,738 wholly supported by public charity, or 68.92 per cent of the whole number; 1,210 partially thus supported, 319 wholly supported by private charity, 18 supported by parents, three supported by relatives, 41 wholly self-supporting, three partially self-supporting, the facts as to the support of 92 persons not being given.

The homeless minors include 703 persons found within reformatory institutions, that is, minors who were juvenile offenders, so-called, the following table presenting a classification of such offenders by institutions and offences:

Juvenile Offenders among Homeless Minors.

Classification of Institutions and Offences.	Males	Females	Both Sexes
Public Reformatory Institutions.	531	127	658
Assault and battery,	8	–	8
Breaking and entering,	42	–	42
Breaking and entering and larceny,	48	–	48
Disobedience,	7	–	7
Disorderly and larceny,	2	–	2
Disorderly and truancy,	5	–	5
Drunkenness,	3	4	7
Evading car fare,	1	–	1

Private Reformatory Institutions.	39	–	39
Larceny,	10	–	10
Stubbornness,	1	–	1
Truancy,	23	–	23
Vagrancy,	1	–	1
Other offences (unknown),	4	–	4
Private Families.	6	–	6
Stubbornness,	2	–	2
Truancy,	4	–	4
Total Juvenile Offenders.	576	127	703
Public reformatory institutions,	531	127	658
Private reformatory institutions,	39	–	39
Private families,	6	–	6

Referring to the aggregates, it will be seen that 658 were found in public reformatory institutions, 165 having been committed for truancy; 138 for stubbornness; 134 for larceny; 48 for breaking and entering and larceny; 42 for breaking and entering; and the others for various offences shown in detail in the table. There were 39 found within private reformatory institutions, 23 of whom were committed for truancy, and 10 for larceny. There were six found within private families, who had been regularly committed thereto, four for truancy, and two for stubbornness. Thus, the total number of

juvenile offenders being 703, 658 were found in public reformatory institutions, 39 in private reformatory institutions, and six in private families.

The following table shows the means of support of the juvenile offenders and of the homeless minors other than juvenile offenders:

Means of Support.	Males	Females	Both Sexes
Juvenile Offenders,	576	127	703
Wholly public charity,	537	127	664
Partially public charity,	21	–	21
Wholly private charity,	18	–	18
Homeless Minors (other than Juvenile Offenders),	2,693	2,028	4,721
Wholly public charity,	1,787	1,287	3,074
Partially public charity,	671	518	1,189
Wholly private charity,	141	160	301
Supported by parents,	13	5	18
Supported by relatives,	–	3	3
Wholly self-supporting,	31	10	41
Partially self-supporting,	3	–	3
Support not given,	47	45	92

Referring to the aggregates, it will be seen that of the 703 juvenile offenders, 664 were wholly supported by public charity; 21 were partially thus supported; and 18 were wholly dependent on private charity.

The table also shows a summary of homeless minors other than juvenile offenders, numbering in the aggregate 4,721, with means of support, 3,074 of the whole number being wholly recipients of public charity, and 1,189 being partially thus supported. These 4,721 persons not classed as juvenile offenders seem to be homeless minors in the strictest sense of the word. They include deserted and abandoned children, waifs, etc. In 18 instances, as shown in the table, the parents supported the children, but were unable to provide homes and care for them properly therein.

Paupers.

The presentations relating to paupers, beginning on page 449, follow the same general lines as those previously given for prisoners, convicts, and homeless minors. The information is deficient with respect to the paupers in a larger number of cases than in any of the other classes.

Physical Condition of the Paupers.

It will be noted from the tabular statement on pages 451 and 452 that a very much larger percentage of paupers is physically defective than was found to be the case with the other socially defective classes, due, of course, to the large number of pauper insane.

It will be seen that out of the whole number, namely, 11,054, only 2,491 were able-bodied, while 5,154, or 46.63 per cent of the whole number, were insane; 964 were subjects of chronic disease; 464 were idiotic; 347, lame; 251, blind; 215, paralytic; and 174 were both epileptic and insane. The others had various forms of physical debility, some having more than one ailment, the facts being shown in detail in the table and not requiring particular characterization here.

Occupations, Sex, Nativity and Descent, and Place of Birth: By Age Periods, Length of Residence, and Illiteracy.

In the presentation beginning on page 453, the foreign born paupers are considered as a whole, and not subdivided with respect to the aliens or other designations applying to political condition, inasmuch as paupers are not supposed to have political condition, and the inquiries upon that point were therefore inapplicable.

The presentation relating to occupations, etc., is followed by a recapitulation on page 459 which summarizes the facts as to nativity and descent by age periods, length of residence in the United States, and illiteracy. Of the whole number, 11,054, there were 5,845 who were native born, of whom 3,077 were of native descent; on the other hand, there were 5,209 foreign born, and 1,411 native born, of foreign descent. Thus, the foreign born paupers and paupers of known foreign descent aggregate 6,620, or 59.89 per cent of the whole number. There were 1,357 for whom the facts as to descent could not be ascertained. Bearing in mind that persons under 21 years of age were not classed as paupers but as homeless minors, it follows that the paupers were 21 years of age or over. Of the whole number, 7,147 were found in the age period 21 but under 60, while 3,907, or 35.34 per cent of the whole number, were 60 years of age and over, and therefore beyond the so-called productive age limit. Of these 3,907 aged paupers, 2,258, or 57.79 per cent, were either foreign born or of foreign descent. Of the entire number of paupers, nine had been in the United States one year or less; 88 had resided therein one year but under six years; 2,035, six years but under 30; and 6,416, or 58.04 per cent of the whole number, 30 years and over. Thus it appears that a considerable proportion of the paupers are long term residents of the United States. Of these, however, 2,820, or 43.95 per cent, were either foreign born or of foreign parentage.

Of the total number of paupers, which, we repeat, was 11,054, there were four who were unable to read, 314 who could not write, and 2,478 who could neither read nor write. The total number of illiterates, therefore, was 2,796, or 25.29 per cent of the total number of paupers. Of these, there were 259 for whom the facts as to descent were unknown; of the others, aggregating 2,537, there were 2,103 foreign born or of known foreign descent, while 434, or 15.52 per cent of the whole number of illiterates, were native born, of native descent.

Inquiries as to employment and unemployment, being relative to conditions existing during the Census year prior to the residence in the institution of the pauper, and also covering persons in gainful occupations only, were largely inapplicable, 99 per cent of the entire time being within this designation. For this reason, we have omitted the subject of employment and unemployment in the presentation of occupations.

The facts as to classes of occupations within which the paupers were placed are summarized in the following analysis table:

Classes of Occupations.	Persons	Age Periods		Length of Residence in the United States					Illiteracy			
		21 but under 60	60 and Over	1 Year or Less	Over 1 Year but under 6 Years	6 Years but under 30 Years	30 Years and Over	Unknown	Cannot Read	Cannot Write	Neither Read nor Write	Total Number of Illiterates
Aggregates.	11,054	7,147	3,907	9	88	2,035	6,416	2,506	4	314	2,478	2,796

Not gainful, etc.,	2	–	2	–	–	–	2	–	–	1	–	1
Unemployed twelve months,	8	1	7	–	–	2	5	1	–	–	1	1
Not stated (unknown),	5,043	3,266	1,777	4	35	952	2,871	1,181	3	129	1,325	1,457

In 5,043 cases included within the total number, 11,054, the returns respecting occupations required the pauper to be classified under the head "not stated (unknown);" that is to say, the occupation followed by the pauper before becoming a recipient of public charity could not be definitely stated. Of the others, 2,206 were classified under domestic service; 1,827, manufactures; 927, laborers; 261, transportation; 255, trade; 203, personal service; 52, professional service; 45, the fisheries; 26, government service; 10, mining; while 10 were either not in gainful occupations, or were reported as unemployed twelve months.

Ages: By Color and Race and Conjugal Condition.

The presentation showing the ages, color and race, and conjugal condition of the paupers will be found on pages 460–463. From the recapitulation it appears, confining our attention entirely to the aggregates, that of the whole number, namely, 11,054, there were 10,885 white, 166 colored, two Indians, and one Chinese. There were, of the whole number, 1,187 in the age period 21 to 29; 1,878, 30 to 39; 2,120, 40 to 49; 1,920, 50 to 59; 3,224, 60 to 79; 683, 80 years of age and over; the facts as to the age of only 42 out of the whole number being unknown.

As to conjugal condition, 4,996, or 45.20 per cent of the whole number, were single, 2,995, married; 2,843, widowed; 58, divorced; the facts as to 162 being unknown.

Place of Birth and Parent Nativity of the Paupers.

The following analysis table presents the place of birth in conjunction with the parent nativity of the paupers:

Place of Birth.	Paupers Born in Specified States or Countries	Paupers Having Fathers Born in Specified States or Countries			Paupers Having Mothers Born in Specified States or Countries			Paupers Having Both Parents Born in Specified States or Countries	Paupers Having One Parent Only Born in Specified States or Countries	Paupers Having One or Both Parents Born in Specified States or Countries

The figures show, referring only to the important lines, that while 5,845 paupers were native born, there were only 3,083 who had fathers native born and 3,109 who had mothers native born. Although 4,577 paupers were born in Massachusetts, there were but 2,057 who had fathers who were born in this State and 2,115 who had mothers born in Massachusetts, and in the aggregate, only 2,436 who had one or both parents born here. Out of the total number of paupers, therefore, there were but 2,436 who had one or both parents born in Massachusetts, 1,032 who had one or both parents born in other New England States, and 300 who had one or both parents born in States outside of New England. This summarizes the influence of native birth upon the pauper population as determined by parent nativity.

As to the foreign born, while there were 5,209 such paupers, or less than one-half the total number, nevertheless, 6,054 had fathers foreign born and 6,056 had mothers of foreign birth. There were 605 paupers who were born in British America, but only 597 who had one or both parents born there. Among the paupers born in British America were 159 Canadian French; but there were 215 who had one or both parents of Canadian birth, French descent. While the natives of Great Britain numbered 533, there were 723 who had one or both parents born in Great Britain. Among the natives of Great Britain, paupers born in England were the most numerous, aggregating 395, while there were 514 who had one or both parents born in England. The paupers who were born in Ireland numbered 3,614, although there were 4,647 who had one or both parents born there. There were in the aggregate 2,018 paupers for whom the facts as to parent nativity could not be ascertained.

The following table recapitulates for the State the place of birth of the paupers in detail:

Place of Birth.	21 Years of Age and Over		
	Males	Females	Both Sexes

Native born,	3,292	2,553	5,845
Foreign born,	2,339	2,870	5,209

All the paupers, it will be seen, if the distinction between paupers and homeless minors previously made is borne in mind, were necessarily 21 years of age and over. Referring to the principal lines in the preceding table, we note that of the 4,577 paupers who were born in Massachusetts, 1,632 were born in the town named, that is, in the town in which they were enumerated, while 2,945 were born in other towns. Of the paupers of foreign birth, numbering in the aggregate 5,209, 3,614 were born in Ireland, 395 in England, 335 in Canada, 176 being of English and 159 of French descent, 158 in Germany, 133 in Nova Scotia, 125 in Scotland, 84 in New Brunswick, 58 in Sweden, 45 in Portugal, 32 in Russia, 29 in Austria and Newfoundland, and 24 in Italy and Prince Edward Island. No numbers so large as these were returned from any other single country.

Residence and Means of Support of Paupers.

The following analysis table presents a statement of the institutions within which the paupers were found, and the means of support of the paupers:

Residence and Means of Support.	Males	Females	Both Sexes
City and Town Almshouses.	2,809	2,369	5,178
Wholly public charity,	2,751	2,346	5,097
Partially public charity,	58	23	81
City and State Institutions.*	2,125	2,214	4,339
Wholly public charity,	2,116	2,206	4,322
Partially public charity,	9	8	17
Private Institutions.	68	93	161
Wholly public charity,	62	76	138

Private Families.	629	747	1,376
Wholly public charity,	224	346	570
Partially public charity,	405	401	806
Aggregates.	5,631	5,423	11,054
Wholly public charity,	5,153	4,974	10,127
Partially public charity,	478	449	927

* Other than almshouses.

Of the total number of paupers considered, namely, 11,054, there were 10,127 supported wholly by public charity, and 927 partially thus supported; 5,178 were found in city and town almshouses; 4,339 in city and State institutions (other than almshouses); 161 in private institutions; and 1,376 in private families.

It will be understood, of course, that these presentations as to paupers do not include persons in the Commonwealth who may have received temporary relief at some time during the Census year in the various cities and towns, being confined entirely to those who are practically full-support paupers; that is, who are supported wholly or chiefly by public or private charity.

Persons Having Acute Diseases.

ON THE BASIS OF CONDITIONS.

For the State.

PERSONS HAVING ACUTE DISEASES.

The number of conditions included in this presentation is shown in the following tabular statement:

Prisoners (acute diseases)	1
Convicts (acute diseases)	19
Convicts (acute diseases — chronic diseases)	1
Convicts (acute diseases — maimed)	1
Convicts (acute diseases — lame)	1
Convicts (acute diseases — other defective physical conditions)	1
Homeless minors (acute diseases)	21
Paupers (acute diseases)	96
Paupers (acute diseases — chronic diseases)	2
Paupers (acute diseases — maimed)	1
Paupers (acute diseases — lame)	2
Paupers (acute diseases — insane)	1
Paupers (acute diseases — idiotic)	1
Paupers (acute diseases — deaf)	2
Paupers (acute diseases — deaf and dumb)	1
Acute diseases (only)	2,493
Acute diseases (chronic diseases)	21
Acute diseases (maimed)	2
Acute diseases (lame)	8
Acute diseases (paralytic)	5
Acute diseases (idiotic)	1
Acute diseases (deaf)	9
Acute diseases (deaf and dumb)	1
Acute diseases (blind)	7
Acute diseases (other defective physical conditions)	4
Acute diseases (chronic diseases — lame)	2
Acute diseases (chronic diseases — paralytic)	1
Acute diseases (chronic diseases — deaf)	1
Acute diseases (paralytic — dumb)	1
Acute diseases (deaf — blind)	1
TOTAL PERSONS HAVING ACUTE DISEASES	2,708

The presentations in this part of the volume represent *conditions* instead of persons. As was stated in the explanatory notes of the four preceding sections, the totals for conditions and persons in the case of prisoners, convicts, homeless minors, and paupers are the same.

This is the first section, strictly speaking, where we consider defective physical condition by itself, and it is therefore beginning with this presentation that we meet duplications as regards persons.

The order of presentation by sections is as follows:

Persons Having Acute Diseases	Paralytic	Dumb
Persons Having Chronic Diseases	Epileptic	Deaf and Dumb
Maimed	Insane	Blind
Lame	Idiotic	Persons Having Other Defective Physical Conditions
Bedridden	Deaf	

In considering this section, we present all persons suffering from acute diseases without regard to whether any or all of them are also lame, paralytic, blind, or afflicted with other defective physical conditions; or whether they are defective socially as well as physically.

If a person has more than one defective physical condition, he must be considered in more than one section. In this manner, duplications are made successively for all those persons who were returned as having more than a single defective condition, and it is owing to these duplications that the presentations are made on the basis of *conditions*. Hence, while each section aggregate represents correctly the number of persons afflicted with the particular defect to which the section relates, the whole number of persons physically defective in the State is of course materially less than the aggregate of all the sections combined.

The first presentation under each section classifies the persons having the physical defect named by native and foreign born, sex, specified age periods, length of residence in the United States, and illiteracy. Political condition and percentages of time employed and unemployed are also presented under some of the sections.

It will be noted that the native born persons have been considered in three classes: Native born (native descent), including those native born persons having fathers also native born; native born (foreign descent), including those native born persons having fathers foreign born; and native born (descent unknown), including those native born persons whose fathers' birthplace could not be ascertained.

In those sections where political condition was presented, the foreign born males have been considered in three classes: Foreign born (naturalized), including those foreign born males 21 years of age and over who have complied with the naturalization laws of the United States; foreign born (alien), including those foreign born males 21 years of age and over who have not complied with the constitutional requirements; and foreign born, including those males of foreign birth neither naturalized nor alien.

To illustrate the manner of reading the table, we refer to the line "Foreign Descent" under males, pages 482 and 483. The first figures opposite the designation "Foreign Descent" are 267, indicating that there were 267 native male persons in the State, of foreign descent, who were afflicted with acute diseases. Following the line continuously, we note that of these 267 persons, 115 were under 15 years of age; 20, 15 but under 20; 129, 20 but under 60; while three were 60 years of age and over; 17 had resided in the United States one year or less; 52, over one year but under six years; 127, six years but under 30 years; 69, 30 years and over, and as to two, the facts upon this point were unknown; 97 were voters and 11 non voters; one could not write, two could neither read nor write, making the total number of illiterates according to the Census classification three. Taken as a whole, they were engaged at their regular, that is, their usual, occupations 29 per cent of the time during the Census year; at some other occupation than their usual one, one per cent of the time; they were unemployed eight per cent of the time; while during 62 per cent of the time the inquiry as to employment and unemployment was inapplicable. For a full explanation of this method of dividing the time as to employment and unemployment, see the statement in connection with the subject on page 426.

The second presentation under each section classifies the persons having specified physical defects by sex and age periods, according to color and race, and conjugal condition. This presentation is so plain as to require no explanation. The analyses in text which relate to each of the presentations contain tables showing for each of the physically defective classes, place of birth in detail, parent nativity, and a classification of occupations.

PERSONS HAVING ACUTE DISEASES. FOR THE STATE.

CLASSIFICATION OF NATIVE AND FOREIGN BORN: BY AGE PERIODS, LENGTH OF RESIDENCE, VOTERS AND NON VOTERS, ILLITERACY, AND EMPLOYMENT AND UNEMPLOYMENT.

	Sex, and Classification of Native and Foreign Born.	Persons	Age Periods				Length of Residence in the United States

PERSONS HAVING CHRONIC DISEASES.

ON THE BASIS OF CONDITIONS.

FOR THE STATE.

PERSONS HAVING CHRONIC DISEASES.

The number of conditions included in this presentation is shown in the following tabular statement:

Prisoners (chronic diseases)	15
Prisoners (chronic diseases — lame)	1
Prisoners (chronic diseases — other defective physical conditions)	1
Convicts (chronic diseases)	65
Convicts (acute diseases — chronic diseases)	1
Convicts (chronic diseases — paralytic)	1
Convicts (chronic diseases — deaf)	1
Homeless minors (chronic diseases)	44
Homeless minors (chronic diseases — lame)	1
Homeless minors (chronic diseases — paralytic)	1
Homeless minors (chronic diseases — idiotic)	1
Homeless minors (chronic diseases — blind)	1
Paupers (chronic diseases)	964
Paupers (acute diseases — chronic diseases)	2
Paupers (chronic diseases — maimed)	5
Paupers (chronic diseases — lame)	20
Paupers (chronic diseases — paralytic)	5
Paupers (chronic diseases — insane)	53
Paupers (chronic diseases — idiotic)	4
Paupers (chronic diseases — deaf)	16
Paupers (chronic diseases — blind)	26
Paupers (chronic diseases — other defective physical conditions)	3
Paupers (chronic diseases — lame — blind)	2
Paupers (chronic diseases — epileptic — insane)	3
Paupers (chronic diseases — idiotic — deaf)	1
Acute diseases (chronic diseases)	21
Acute diseases (chronic diseases — lame)	2
Acute diseases (chronic diseases — paralytic)	1
Acute diseases (chronic diseases — deaf)	1
Chronic diseases (only)	13,428
Chronic diseases (maimed)	72
Chronic diseases (lame)	243
Chronic diseases (bedridden)	18
Chronic diseases (paralytic)	43
Chronic diseases (epileptic)	8
Chronic diseases (insane)	15
Chronic diseases (idiotic)	5
Chronic diseases (deaf)	210
Chronic diseases (dumb)	3
Chronic diseases (deaf and dumb)	3

Tabular Analyses

For the Following Presentations:

	Pages
Persons Having Acute Diseases,	479–484
Persons Having Chronic Diseases,	485–490
Maimed,	491–496
Lame,	497–502
Bedridden,	503–508
Paralytic,	509–513

The presentations relating to defective physical conditions are somewhat condensed in comparison with those which relate to defective social conditions, including under the last-named head, prisoners, convicts, homeless minors, and paupers.

The condensation eliminates certain details of occupations, by sex and descent, exact ages, etc., which were not considered of sufficient general importance as related to the physically defective persons to warrant the extended space required for their presentation. Nevertheless, if such points are desired by any special student of the subject or of any of the classes included under the head of physical defectives, they can be supplied by the Department upon request. Each statistical presentation referred to under the following analysis is preceded by a note containing essential explanatory matter to which the attention of the reader is directed.

Persons Having Acute Diseases.

The presentation appears on pages 479–484. The males number 1,251; the females 1,457; comprising, therefore, in the aggregate, 2,708 persons who were afflicted with acute diseases. Of these persons, 1,859 were native born, comprising 1,164 of native descent, 544 of foreign descent, and 151 of descent unknown. The following analysis table presents the place of birth in detail by States and countries:

Place of Birth.	Number of Persons	Place of Birth.	Number of Persons
Native Born.	1,859	Native Born — Con.	
Arkansas,	1	Massachusetts,	1,369
California,	4	Town named,	851
Connecticut,	33	Other towns,	518
District of Columbia,	2	Michigan,	2
Florida,	1	New Hampshire,	66
Illinois,	2	New Jersey,	7
Indiana,	1	New York,	74
Maine,	119	North Carolina,	4
Maryland,	4	Ohio,	2

England,	82	West Indies,	2
France,	3	Aggregates.	2,708
Germany,	28	Native born,	1,859
Greece,	2	Foreign born,	849

Of the whole number of native born, namely, 1,859, there were 1,369 who were born in Massachusetts. Of the foreign born (849), there were 351 born in Ireland; 106 born in Canada, of whom 44 were French Canadians. Persons born in other British provinces in America, New Brunswick, Newfoundland, Nova Scotia, and Prince Edward Island, number in the aggregate 127. These are the leading lines among the foreign born.

Place of birth and parent nativity are shown in the following table:

Of the whole number, 723 were within the class domestic service; 134 in trade; 398 in manufactures; and 123 were laborers. There were 295 who were scholars; 127, retired; 105, dependents; 348, at home; and 140 for whom the facts as to occupation were not stated. These are the important lines.

Persons Having Chronic Diseases.

The presentation appears on pages 485–490, the form being identical with that relating to persons having acute diseases. The total number of persons afflicted with chronic diseases was 15,516, this aggregate including 8,412 males and 7,104 females. The native born numbered 11,137, of whom 8,976 were of native descent, 1,774 of foreign descent, and 387 of descent unknown.

The place of birth in detail by States and countries is shown in the following table:

Foreign Born.	4,379	Aggregates.	15,516
American Citizens (born abroad),	44	Native born,	11,137
American Citizens (born at sea),	1	Foreign born,	4,379

Of the whole number of native born, namely, 11,137, there were 7,733 who were born in Massachusetts. The foreign born, who numbered in the aggregate 4,379, included the following, which are the most numerous classes: Born in Ireland, 2,252; in Canada, 619, of whom 349 were French Canadians; in England, 440; in British provinces in America, not including Canadians previously specified, but including natives of New Brunswick, Newfoundland, Nova Scotia, and Prince Edward Island, 452.

Place of birth and parent nativity are shown in the following table:

Place of Birth. While there were, as previously stated, 11,137 native born persons who were afflicted with chronic diseases, the number of persons who had native born fathers was but 9,021, and there were 9,160 who had native born mothers. On the other hand, while there were 4,379 persons foreign born, there were 6,071 who had foreign born fathers and 5,937 who had foreign born mothers.

The following table shows the distribution by classes of occupation of persons afflicted with chronic diseases:

Classes of Occupations.	Persons	Age Periods				Length of Residence in the United States					Political Condition		Illiteracy

The foregoing classification is general and not scientific, the diseases being simply grouped under common English designations roughly indicating the more numerous classes.

The Maimed.

The presentation appears on pages 491-496. The total number of maimed persons within the population was 3,243, including 2,932 males and 311 females. The native born numbered 2,292, including 1,640 of native descent, 566 of foreign descent, and 86 of descent unknown. The foreign born numbered 951.

The place of birth in detail by States and countries is given in the following table:

Place of Birth.	Number of Persons	Place of Birth.	Number of Persons
Native Born.	2,292	Foreign Born — Con.	
Alabama,	1	Austria,	6
California,	1	British Possessions, Other	2

The native born numbered, as previously stated, 2,292; there were, however, only 1,648 persons who had native born fathers and 1,665 who had native born mothers. On the other hand, while the foreign born numbered but 951, there were 1,507 who had foreign born fathers and 1,494 who had foreign born mothers.

The following table classifies the maimed persons according to occupations:

Classes of Occupations.	Persons	Age Periods				Length of Residence in the United States					Political Condition		Illiteracy			
		Under 15	15 but under 20	20 but under 60	60 and Over	1 Year or Less	Over 1 Year but under 6 Years	6 Years but under 30 Years	30 Years and Over	Unknown	Voters	Non Voters	Cannot Read	Cannot Write	Neither Read nor Write	Total Number of Illiterates

EPILEPTIC.

ON THE BASIS OF CONDITIONS.

For the State.

EPILEPTIC.

The number of conditions included in this section is shown in the following tabular statement:

Prisoners (epileptic)	1
Convicts (epileptic)	3
Homeless minors (epileptic)	18
Homeless minors (lame — epileptic)	1
Homeless minors (epileptic — insane)	8
Homeless minors (epileptic — idiotic)	17
Homeless minors (paralytic — epileptic — idiotic)	1
Paupers (epileptic)	96
Paupers (paralytic — epileptic)	1
Paupers (epileptic — insane)	174
Paupers (epileptic — idiotic)	12
Paupers (epileptic — blind)	2
Paupers (chronic diseases — epileptic — insane)	3
Paupers (maimed — epileptic — insane)	3
Paupers (lame — epileptic — insane)	3
Paupers (bedridden — epileptic — insane)	5
Paupers (paralytic — epileptic — insane)	2
Paupers (paralytic — epileptic — idiotic)	1
Paupers (epileptic — insane — other defective physical conditions)	2
Chronic diseases (epileptic)	8
Chronic diseases (epileptic — blind)	1
Maimed (epileptic)	3
Maimed (lame — epileptic)	1
Maimed (paralytic — epileptic — idiotic)	1
Lame (epileptic)	5
Lame (epileptic — idiotic)	1
Lame (epileptic — dumb)	1
Bedridden (epileptic — insane)	2
Paralytic (epileptic)	6
Paralytic (epileptic — deaf and dumb)	1
Epileptic (only)	750
Epileptic (insane)	16
Epileptic (idiotic)	9
Epileptic (deaf)	5
Epileptic (dumb)	4
Epileptic (blind)	5
Epileptic (insane — deaf and dumb)	1
Epileptic (insane — other defective physical conditions)	1
Epileptic (idiotic — dumb — other defective physical conditions)	1
TOTAL EPILEPTIC	1,175

Particular attention is called to the explanatory text contained in the note preceding the presentation relating to acute diseases on pages 480 and 481, *ante*, since in general it applies also to this presentation.

EPILEPTIC. FOR THE STATE.

CLASSIFICATION OF NATIVE AND FOREIGN BORN: BY AGE PERIODS, LENGTH OF RESIDENCE, VOTERS AND NON VOTERS, ILLITERACY, AND EMPLOYMENT AND UNEMPLOYMENT.

DEAF AND DUMB.

ON THE BASIS OF CONDITIONS.

For the State.

DEAF AND DUMB.

The number of conditions included in this presentation is shown in the following tabular statement:

Convicts (deaf and dumb)	2
Homeless minors (deaf and dumb)	114
Homeless minors (insane — deaf and dumb)	2
Homeless minors (idiotic — deaf and dumb)	1
Paupers (deaf and dumb)	19
Paupers (acute diseases — deaf and dumb)	1
Paupers (maimed — deaf and dumb)	1
Paupers (lame — deaf and dumb)	2
Paupers (insane — deaf and dumb)	9
Paupers (idiotic — deaf and dumb)	2
Paupers (deaf and dumb — blind)	4
Paupers (deaf and dumb — other defective physical conditions)	2
Paupers (insane — deaf and dumb — blind)	1
Acute diseases (deaf and dumb)	1
Chronic diseases (deaf and dumb)	3
Chronic diseases (deaf and dumb — blind)	1
Chronic diseases (paralytic — deaf and dumb — blind)	1
Lame (deaf and dumb)	5
Lame (idiotic — deaf and dumb)	1
Paralytic (deaf and dumb)	2
Paralytic (epileptic — deaf and dumb)	1
Epileptic (insane — deaf and dumb)	1
Idiotic (deaf and dumb)	6
Deaf and dumb (only)	757
Deaf and dumb (blind)	5
Deaf and dumb (other defective physical conditions)	1
TOTAL DEAF AND DUMB	945

Particular attention is called to the explanatory text contained in the note preceding the presentation relating to acute diseases on pages 480 and 481, *ante*, since in general it applies also to this presentation.

BLIND,	567–572
PERSONS HAVING OTHER DEFECTIVE PHYSICAL CONDITIONS,	573–577

THE EPILEPTIC.

The presentation relating to epileptic persons appears on pages 531–536. The number of such persons reported was 1,175, comprising 704 males and 471 females. The native born epileptics numbered 974 and the foreign born 201; the native born included 598 persons of native descent, 278 of foreign descent, and 98 for whom the facts as to descent were unknown.

The place of birth in detail by States and countries is given in the following table:

PLACE OF BIRTH.	Number of Persons	PLACE OF BIRTH.	Number of Persons
NATIVE BORN.	974	NATIVE BORN — CON.

Poland,	1	Foreign born,	201

The preceding table shows that of the 974 epileptic persons who were native born, 759, or a large proportion of the entire number, were born in Massachusetts. Of the foreign born, who number in the aggregate 201, there were 72 born in Ireland, 46 in Canada, and 38 in England. The epileptics of Canadian birth were equally divided between those of French and English ancestry.

The place of birth and parent nativity are shown in the following table:

Place of Birth. The native born epileptics numbered in the aggregate, as previously stated, 974 persons, while there were but 603 persons who had native born fathers and 616 who had native born mothers. The foreign born epileptics numbered 201, but those having foreign born fathers numbered 450 and those having foreign born mothers 443.

The distribution of these persons according to occupations is shown in the final analysis table next presented.

Out of the whole number, namely, 1,175, there were 373, or slightly less than one-third of the epileptics, classed as dependents, and 300 others were returned as being at home, without occupation. The salient lines showing the occupation of those for whom this information was returned are: Domestic service, 82; manufactures, 57; and laborers, 34. In the case of 198 epileptics, the facts as to occupation were not obtained.

It will be borne in mind that the question of occupation related to the occupation of the person prior to his falling into the defective condition in which he was found, and with respect to the epileptics it plainly appears that so far as relates to the majority, they either had no occupation or had been in the condition of epilepsy so long that the fact as to prior occupation was not obtainable.

The Insane.

The statistics relating to the insane population of the State will be found on pages 537-542. In the aggregate, the insane persons enumerated numbered 7,301 and included 3,251 males and 4,050 females. The native born insane persons numbered 4,410, including 2,168 persons of native descent, 1,012 of foreign descent, and 1,230 for whom the facts as to descent were unknown. The foreign born insane numbered 2,891.

A large proportion of the native born insane were born in Massachusetts, such persons numbering 3,392 out of 4,410. Of the foreign born insane, the natives of Ireland predominate, numbering in the aggregate, 1,843. The insane born in Canada numbered 236, of whom 134 were of English descent and 102 were of French descent; natives of England numbered 225; of Germany, 110; of the various British provinces, not including Canada, but including New Brunswick, Newfoundland, Nova Scotia, and Prince Edward Island, 196.

Although the number of native born insane persons was 4,410, there were but 2,182 persons who had fathers native born and but 2,212 who had native born mothers. On the other hand, while the number of foreign born insane persons was 2,891, there were 3,367 who had foreign born fathers and 3,365 who had foreign born mothers.

The occupations of the insane, so far as returned, are shown in the following table:

The information contained in this table as to occupations, being derived from the return of the occupation prior to the insanity of the person, is comparatively meagre. In the case of 5,991 persons the return is simply that the insane person was a dependent. There were 104 others returned as being at home, without occupation. The insane who were in domestic service prior to insanity numbered 325; in manufactures, 72; in trade, 61; professional, 38; in agriculture, 23; these being the salient lines so far as definite returns as to occupation are concerned.

The Idiotic.

The statistics of persons returned as idiotic appear on pages 543–548. Such persons numbered in the aggregate 1,868, including 1,114 males and 754 females. Of these persons 1,641 were native born, including 958 of native descent, 490 of foreign descent, and 193 for whom the facts as to descent were unknown. The foreign born idiotic persons numbered 227.

The place of birth in detail by States and countries is shown in the following table:

Of the whole number of idiotic persons, namely, 1,868, there were 655 who were returned as dependent, and 738 were returned as at home, without occupation. Of the others, 61 were found in domestic service, and 57 were laborers, very few being returned under the other occupation heads.

The Deaf.

The statistics relative to persons afflicted with deafness may be found on pages 549-554. Such persons numbered in the aggregate 4,607. They included 1,939 males and 2,668 females. The native born deaf persons numbered 3,796, of whom 3,274 were of native descent, 394 of foreign descent, and 128 of descent unknown. The foreign born persons who were deaf numbered 811.

The place of birth in detail by States and countries is given in the following table:

Bearing in mind that the whole number of persons returned as deaf was 4,607, we may note that 1,873 were returned as in domestic service; 111 in trade; 254 in agriculture; 626 in manufactures; and 137 were laborers; these being the important lines so far as the facts as to occupations were definitely stated. There were 712 such persons returned as retired; and 375 were reported as dependents.

The Dumb.*

The statistics relative to persons who were dumb may be found on pages 555–560. Persons reported under this designation numbered 145, or a very small proportion of the entire population. Of these dumb persons, 89 were males and 56 were females, while 120 were native born and 25 were foreign born. The native born included 70 of native descent, 45 of foreign descent, and five for whom the facts as to descent were unknown.

The place of birth in detail by States and countries is given in the following table:

Place of Birth.	Number of Persons	Place of Birth.	Number of Persons
Native Born.	120	Foreign Born — Con.	
Connecticut,	3	England,	5
Maine,	3	Germany,	1
Massachusetts,	107	Ireland,	5

Out of the whole number of dumb persons, namely, 145, there were 19 who were reported as dependents, and 77 reported as at home, without other occupation. In 21 cases the facts upon this point could not be ascertained, and the remaining dumb persons, comparatively few in number, were distributed through the different occupation classifications, as shown by the table.

The Deaf and Dumb.

The preceding presentations relating to the deaf and to the dumb include only such persons as were returned as deaf only and dumb only. The statistics relating to persons

returned as both deaf and dumb appear on pages 561–566. Such persons numbered in the aggregate 945, including 537 males and 408 females. The native born numbered 728, including 432 persons of native descent, 264 of foreign descent, and 32 of descent unknown. The foreign born deaf and dumb persons numbered 217.

The facts as to place of birth in detail by States and countries are given in the following table:

Place of Birth.	Number of Persons	Place of Birth.	Number of Persons
Native Born.	728	Foreign Born.	217
Alabama,	3	American Citizens (born abroad),	2
Arkansas,	1	Austria,	3

Rhode Island,	7	Wales,	1
United States, *n. s.*,	3	Aggregates.	945
Virginia,	1	Native born,	728
Vermont,	21	Foreign born,	217

Of the 728 native born deaf and dumb persons, 531 were born in Massachusetts. Of the 217 foreign born, 80 were born in Canada, including 60 French Canadians; 44 in Ireland; 30 in England; 15 were born in British provinces in America, exclusive of Canada, that is to say, in New Brunswick, Newfoundland, Nova Scotia, and Prince Edward Island; while 16 were born in Scotland; the countries named furnishing, respectively, the largest numbers found in any single country.

As to parent nativity, the following table presents a summary of the results:

Of the whole number of persons returned as deaf and dumb, namely, 945, there were 165 returned as in domestic service; 226 in manufactures; 209 were scholars; 67 were returned as dependent; 90 were reported as at home without other occupation designation; and the facts as to 49 were not stated, being unknown. These are the more important lines in the table.

The Blind.

The statistics relating to the blind are presented on pages 567–572. The total number of blind persons was 3,983. The males numbered 2,267 and the females 1,716. The native born blind persons numbered 2,731, including 2,166 of native descent, 479 of foreign descent, and 86 of descent unknown. The foreign born numbered 1,252.

It may be noted that of the blind persons 1,483 were voters and 253 non voters. With respect to illiteracy, 23 were unable to read, 61 were unable to write, and 790 could neither read nor write. As to conjugal condition, the number reported as single was 1,365; married, 1,617; widowed, 987; and divorced, 10.

The place of birth in detail by States and countries is given in the following table:

The native born blind persons numbered, as previously stated, 2,731, and those having fathers native born 2,181, while those having mothers native born numbered 2,201. The foreign born numbered 1,252, but those having fathers native born numbered 1,708, and those having mothers native born 1,685.

The statistics relating to the occupations of the blind are given in the following table:

Classes of Occupations.	Persons	Age Periods				Length of Residence in the United States					Political Condition		Illiteracy			
		Under 15	15 but under 20	20 but under 60	60 and Over	1 Year or Less	Over 1 Year but under 6 Years	6 Years but under 30 Years	30 Years and Over	Unknown	Voters	Non Voters	Cannot Read	Cannot Write	Neither Read nor Write	Total Number of Illiterates

Not stated (unknown),	245	-	22	153	70	4	8	93	140	-	86	15	2	9	67	78

Out of the total number, 3,983, there were 695 found in domestic service; 304 in manufactures; 131 in trade; 151 in agriculture; and 127 were laborers. These are the more important lines of gainful occupations. There were also 319 who were reported as scholars; 666 as retired; 809 as dependents; 231 as at home, without occupation; and with respect to 245, the occupation was not stated.

We may point out that of the total number of blind persons, 1,799, or nearly 50 per cent of the entire number, were found in the age period 60 years and over, that is to say, they were above the usual productive age limit; 1,638 were found in the period 20 but under 60; 213 in the period 15 but under 20; and 333 were under 15 years of age.

Persons Having Other Defective Physical Conditions.

Besides the persons having the specified defects which have been considered in detail, there were 1,532 persons who were physically defective in various other ways. The statistics relating to these are presented on pages 573-577. Such persons comprised 971 males and 561 females. The native born among them numbered 1,191, including 821 persons of native descent, 303 of foreign descent, and 67 of descent unknown. The foreign born numbered 341.

The place of birth in detail by States and countries is given in the following table:

Place of Birth.	Number of Persons	Place of Birth.	Number of Persons
Native Born.	1,191	Foreign Born — Con.	
Alabama,	1	British Possessions, Other	1
California,	1	Canada,	57

It is shown by the preceding table that the aggregate native born numbered 1,191; there were only 822 who had fathers native born and 844 who had mothers native born; and while the foreign born numbered but 341, there were 640 who had fathers foreign born and 625 who had mothers foreign born.

As to occupations, the facts appear in the following table:

Classes of Occupations.	Persons	Age Periods				Length of Residence in the United States					Political Condition		Illiteracy			
		Under 15	15 but under 20	20 but under 60	60 and Over	1 Year or Less	Over 1 Year but under 6 Years	6 Years but under 30 Years	30 Years and Over	Unknown	Voters	Non Voters	Cannot Read	Cannot Write	Neither Read nor Write	Total Number of Illiterates

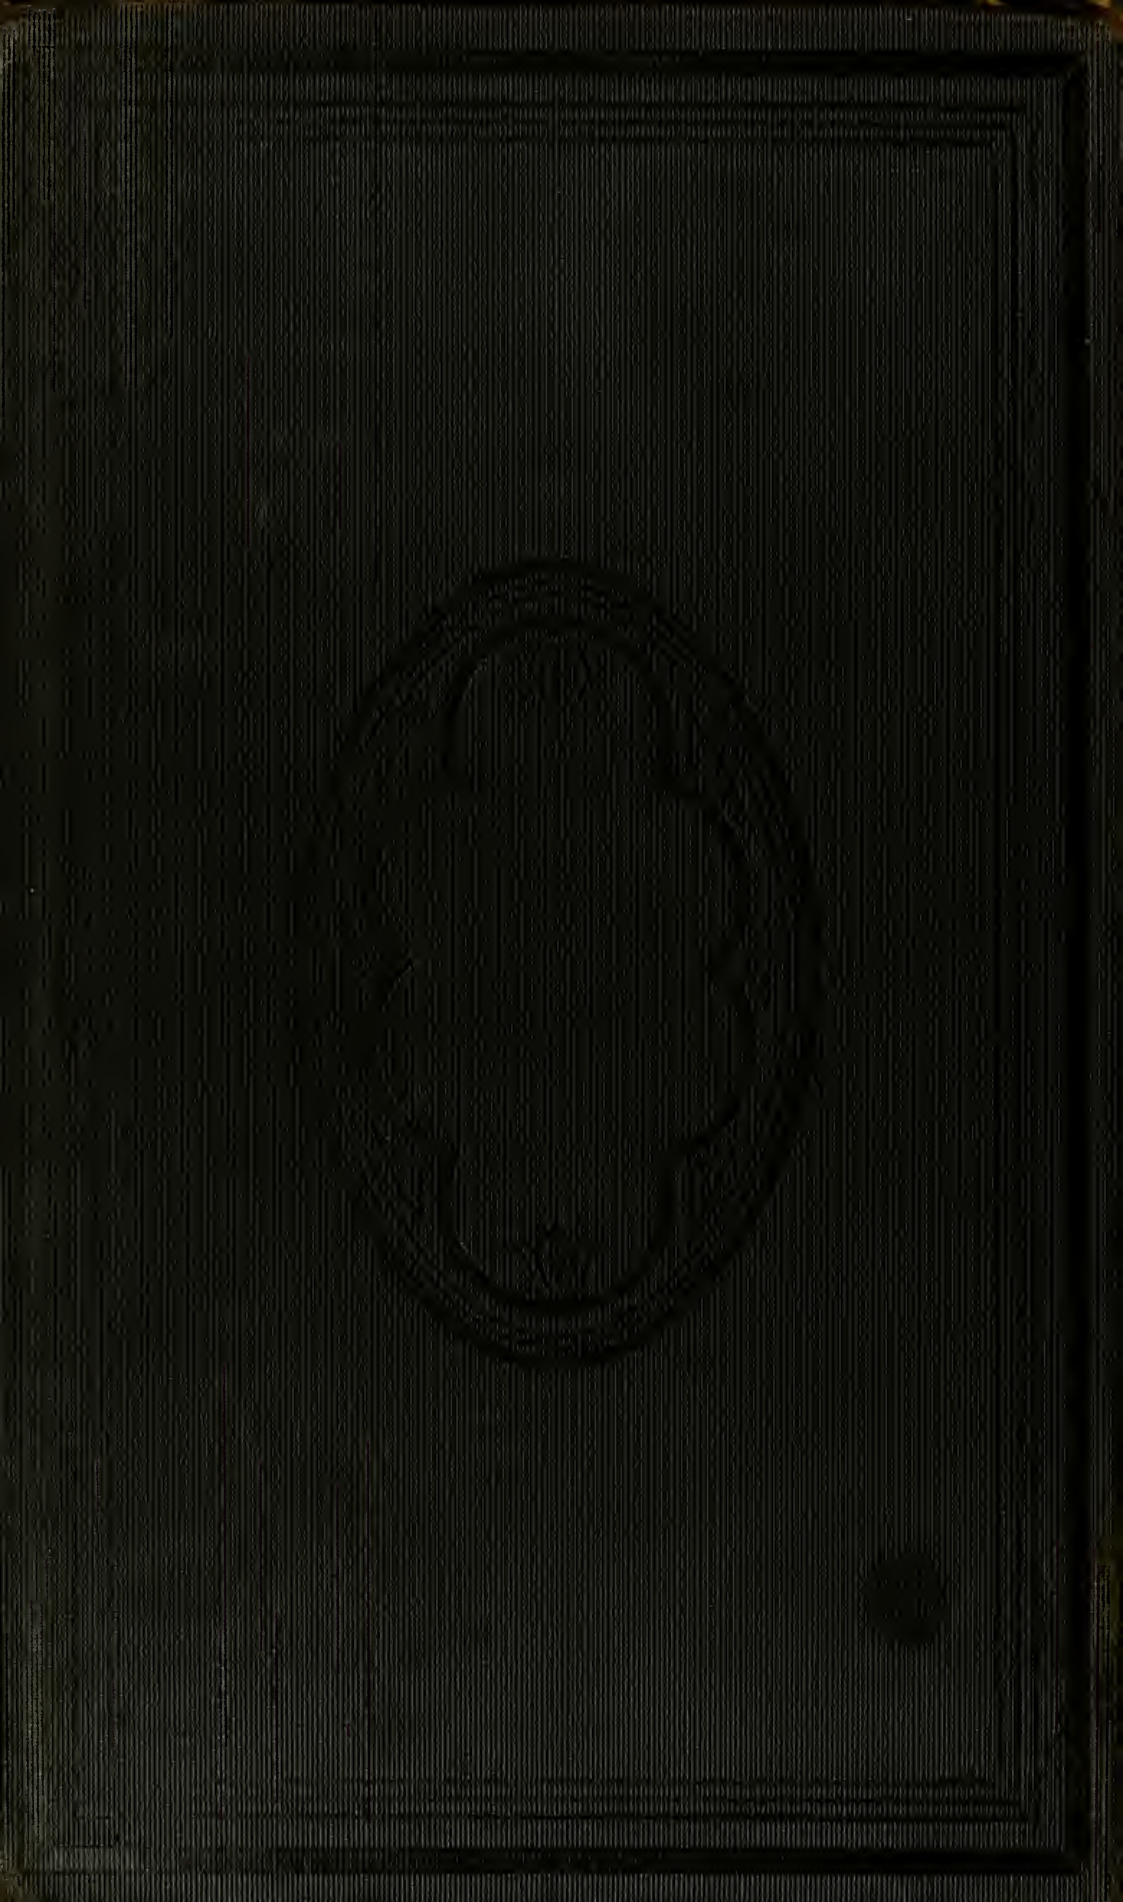
Of the whole number, 1,532, there were 234 found in domestic service; 204 in manufactures; 128 were reported as scholars; 132 as retired; 184 as dependents; 188 at home, without occupation; and with respect to 111, the facts as to occupation were unknown.

Comparison of Persons reported as Socially or Physically Defective in 1885 and 1895.

For the purpose of comparison a tabular statement is appended showing for 1885 and 1895 the number of persons reported under each defective designation. Some of the persons appear under more than one designation for the reason stated in the note page 481, *ante*, and elsewhere. Therefore no aggregation of persons can be made by aggregating these figures.

Classification.	1885	1895	Increase (+), or Decrease (−), in 1895
Prisoners,	665	1,378	+713
Convicts,	3,426	6,042	+2,616
Homeless minors,	5,232	5,424	+192
Paupers,	8,394	11,054	+2,660
Persons: —			
Having acute diseases,	1,184	2,708	+1,524
Having chronic diseases,	14,364	15,516	+1,152
Maimed,	2,382	3,243	+861
Lame,	5,136	7,808	+2,672
Bedridden,	433	397	—36
Paralytic,	2,540	3,057	+517
Epileptic,	-	1,175	-
Insane,	5,263	7,301	+2,038
Idiotic,	1,638	1,868	+230
Deaf only,	2,973	4,607	+1,634
Dumb only,	134	145	+11
Deaf and dumb,	828	945	+117
Blind,	3,582	3,983	+401
Otherwise defective,	680	1,532	+852


In 1885, epileptic persons were not separately presented. Hence the preceding table contains no comparative figures under that designation.
